

Amplifying Digital Presence in the Construction Industry - April 18, 2024

Peer-to-peer digital content sharing for the construction and building industry

SUNDRE, ALBERTA, CANADA, April 18, 2024 /EINPresswire.com/ -- Since its establishment in 2003, Construction Links Network has emerged as a premier news and information hub in the construction sector. With a commitment to enhancing the digital presence and search engine visibility of its members, Construction Links Network has become an indispensable resource for a wide array of professionals. This includes construction managers, contractors, developers, building and property managers, architects, designers, engineers, and government officials.

As a dynamic hub for digital content dissemination, Construction Links Network offers its members diverse engagement opportunities through news releases, company announcements, blogs, podcasts, webinars, case studies, whitepapers, and videos.

This week's top video features a recap by Ponts Jacques Cartier of the original Champlain Bridge's deconstruction in Montreal. The project, executed by Nouvel Horizon Saint-Laurent G.P.—a consortium of Pomerleau Inc. and Delsan-A.I.M. Environmental Services—meticulously planned to minimize environmental and public impact, repurposing materials from the dismantled structure. With 56 spans, 53 piers, and 53 pier footings removed, the project finished two months early and on budget at \$225.7 million, absorbing \$4.9 million in COVID-19 related costs. The bridge's removal paves the way for the Héritage Champlain project on the newly available land.
