Definition

The cloud infrastructure service market refers to the industry sector encompassing the provision of various computing resources and services via the cloud, including storage, networking, virtual machines, databases, and other IT resources. These services are typically delivered to users over the internet on a pay-as-you-go or subscription basis, allowing organizations to scale their IT infrastructure dynamically and efficiently without the need for significant upfront investments in hardware or software.

Major Highlights of the Global Cloud Infrastructure Service Market report released by HTF MI

Global Cloud Infrastructure Service Market Breakdown by Service (Computing as a service, Storage as a service, Networking as a service, Others) by Deployment Model (Public, Private, Hybrid) by Vertical (IT and Telecommunications, Banking, Financial, and Insurance Services, Government and Public Sector, Others) and by Geography (North America, South America, Europe, Asia Pacific, MEA)
