Market Drivers, Restraints, and Opportunities

Drivers:

- Increasing prevalence of chronic diseases
- Growing adoption of advanced clinical nutritional products
- Government investments in healthcare R&D

Restraints:

Lack of awareness
Stringent regulations

Opportunities:

Advancements in clinical nutrition
Potential in emerging markets

COVID-19 Impact:

Authorities like WHO, ESPEN, and ASPEN have issued guidelines for nutritional assessment and screening for hospitalized COVID-19 patients. Nutrition therapy based on these guidelines has been crucial for patient care.

Route of Administration:

Oral Segment: Contributed to nearly half of the market share in 2018 and is expected to maintain its dominance with a CAGR of 5.8% from 2019 to 2026. This segment is favored for its ease of use and convenience.

Application Segments:

Cancer: Largest market share in 2018 and projected to grow at the highest CAGR of 6.0% from 2019 to 2026. This growth is driven by nutritional needs arising from treatments like chemotherapy and radiation therapy.

Regional Insights:

North America: Largest revenue contributor in 2018 and expected to maintain its lead due to the rising incidence of chronic diseases.

Asia-Pacific: Expected to grow at the fastest CAGR of 6.0% from 2019 to 2026, driven by increasing metabolic disorders and rising awareness.
