The high cost of implementation and complexity of integrating with existing cybersecurity infrastructure can hinder market growth. However, enterprise-wide shifts toward remote and hybrid work models and growth in the adoption of cloud services across sectors offer lucrative opportunities for market players.

The data loss prevention market is segmented on the basis of type, deployment mode, application, end-use industry, and region. On the basis of type, the market is segmented into network DLP, endpoint DLP, and storage DLP. On the basis of deployment mode, the market is segmented into on-premise, hybrid, and cloud. On the basis of application, the market is

segmented into cloud storage, policy standards and procedures, encryption, web and e-mail, and others. On the basis of the end-use industry, the market is segmented into BFSI, healthcare, retail, IT and telecom, government and defense and others. Region-wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Based on end-use industry, the BFSI segment is projected to witness an exponential rate of 22.6% over the forecast period. This is attributed to increase in the adoption of digital solutions in the BFSI sector has led to the development of completely advanced programs that adhere to the maintenance of security systems, which further contribute to the global market growth in this sector.

Based on application, the cloud storage segment accounted for the largest share in 2022, contributing to more than one-third of the data loss prevention market revenue, owing to the growth in demand for data loss prevention for cloud-based services. However, the encryption segment is expected to witness the largest CAGR of 22.3% from 2023 to 2032 and is projected to maintain its lead position during the forecast period. It provides various benefits to several organizations.

Based on region, North America held the highest market share in terms of revenue in 2022, accounting for more than one-third of the data loss prevention market revenue. The increase in the usage of data loss prevention in businesses to improve businesses and the customer experience is anticipated to propel the growth of the market in this region. However, Asia-Pacific is projected to manifest the highest CAGR of 21.2% from 2023 to 2032. Countries such as China, India, and South Korea are at the forefront, embracing digital technologies to enhance their effectiveness and competitiveness, which is further expected to contribute to the growth of the market in this region.

The market players operating in the data loss prevention market are Check Point Software Technologies Ltd., Cisco Systems, Inc., Forcepoint LLC., IBM Corporation, Microsoft Corporation, Next DLP, Inc., Palo Alto Networks, Inc., Proofpoint, Inc., Broadcom Inc. And Trend Micro Incorporated. These major players have adopted various key development strategies such as business expansion, new product launches, and partnerships, which help to drive the growth of the data loss prevention market globally.

## KEY FINDINGS OF THE STUDY

- By solution type, the storage/Data center DLP segment accounted for the largest data loss prevention market size in 2022.
- By deployment mode, the on-premise segment accounted for the largest data loss prevention market share in 2022.
- By application, the cloud storage segment is anticipated to grow at an exponential growth rate in data loss prevention market forecast period.
- By industry vertical, the IT & Telecom segment accounted for the largest data loss prevention market share in 2022.
- Region wise, North America generated the highest revenue in 2022.

Thanks for reading this article you can also get individual chapter-wise sections or region-wise report versions like North America Europe or Asia.

If you have any special requirements, please let us know and we will offer you the report as per your requirements.

Lastly this report provides market intelligence most comprehensively. The report structure has been kept such that it offers maximum business value. It provides critical insights into the market dynamics and will enable strategic decision-making for the existing market players as well as those willing to enter the market.

### About Us:

Allied Market Research (AMR) is a market research and business-consulting firm of Allied Analytics LLP, based in Portland, Oregon. AMR offers market research reports, business solutions, consulting services, and insights on markets across 11 industry verticals. Adopting extensive research methodologies, AMR is instrumental in helping its clients to make strategic business decisions and achieve sustainable growth in their market domains. We are equipped with skilled analysts and experts and have a wide experience of working with many Fortune 500 companies and small & medium enterprises.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies. This helps us dig out market data that helps us generate accurate research data tables and confirm utmost accuracy in our market forecasting. Every data company in the domain is concerned. Our secondary data procurement methodology includes deep presented in the reports published by us is extracted through primary interviews with top officials from leading online and offline research and discussion with knowledgeable professionals and analysts in the industry.
