

Battery Swapping Market Size to Worth USD 23.58 billion by 2030 | With a 45.6% CAGR by Exactitude Consultancy

The Exactitude Consultancy Battery Swapping Market Report – Size, Trends, And Global Forecast 2024-2030

LUTON, BEDFORDSHIRE, UNITED KINGDOM, April 24, 2024 /EINPresswire.com/ -- Global [Battery Swapping](#) Market research report published by Exactitude Constancy reveals the current outlook of the global and key regions from the following perspectives: Key players, countries, product types, and end industries. The report studies the top companies in the global market and divides the market into several parameters.

This Battery Swapping Market research report pinpoints the industry's competitive landscape to understand the international competition. This report study explains the expected growth of the global market for the upcoming years from 2024 to 2030. This research report is accumulated based on static and dynamic perspectives on business.

“

Growing demand for battery swapping solutions is driven by the need for fast, convenient, and sustainable energy replenishment for electric vehicles.”

Exactitude Consultancy

The global battery swapping market size is projected to reach USD 23.58 billion by 2030, at a CAGR of 45.6% during the forecast period.

Exactitude Consultancy is a leading market research and consulting firm, providing strategic insights and data-driven solutions for businesses across various industries. For more information, contact us at info@exactitudeconsultancy.com or visit our website at <https://exactitudeconsultancy.com>.

NIO Power, Gogoro, Immotor, Aulton, Sun Mobility, Amara Raja, Amplify Mobility, ChargeMYGaadi, EChargeUp solutions pvt Ltd, Esmite Solutions Pvt Ltd, Gogoro, Inc., Lithion Power Pvt Ltd, Numocity, Oyika Pte Ltd.

Recent Developments

In August 2022, NIO Power started testing 3rd generation battery swapping stations that can send power back to the grid. When one EV driver replaces his/her battery at the charging station, the other ten or eleven batteries can then be discharged back to the grid for five to ten minutes, barely interfering with the regular battery replacement services.

In August 2022, EVeex partnered with SUN Mobility to deploy over 10,000 vehicles across India in the coming years. The firms hope to further accelerate the adoption of electric vehicles to address the growing environmental issues.

In July 2022, Immotor received USD 28 million in a series C financing headed by PTT, a Petronas affiliate, and PIVL, a Thai state-owned corporation. Immotor stated that it will examine the Southeast Asian market using links with its two conglomerate financiers, PTT and Petronas.

In October 2021, NIO Power opened its first battery-swapping station in Norway. The Power Swap Station 2.0 features a better battery-swapping experience and can perform 312 swaps every day. Additionally, users can start the self-service switch with a single tap on the central display without getting out of the car, and the vehicle can autonomously drive into the station.

The Battery Swapping market report has segmentation to increase accuracy and make data collection easier. A category, a distinguishing factor in an industry, is the type of distribution channel, application, product or service. This level of segmentation makes it easier to analyze and understand the market. At the same time, what types of consumers become customers of this industry are highlighted. Regarding distribution channels, the market report looks at the different distribution technologies for a product or service.
