

# ASAP Fasteners Introduces an Extended Range of Bearings and Fasteners to Provide Comprehensive Fulfillment Solutions

*ASAP Fasteners, an ASAP Semiconductor website, features expanded offerings and services to cater to rising demand in the global aerospace-grade fastener market.*

ANAHEIM, CALIFORNIA, UNITED STATES, April 25, 2024

/EINPresswire.com/ -- ASAP Fasteners, an online purchasing platform owned by parts distributor ASAP

Semiconductor, unveils an extended inventory selection, bolstering its

hardware offerings to cater to the [global aerospace-grade fastener](#) market. While already featuring a database of over 2 billion product listings that range from factory-new condition to obsolete status, ASAP Fasteners strategically expands offerings to meet shifting industry needs and market trends.

“

With over 2 billion listings and continued expansion of offerings, ASAP Fasteners is ready to meet the diverse needs of the aerospace industry.”

*Joe Faruqui*

Since its initial launch, the ASAP Fasteners purchasing platform has operated as a [source for aerospace bearings, fasteners, and connectors](#), as well as other various hardware solutions. To address a customer base that includes defense contractors, government entities, and airlines, ASAP Semiconductor has expanded ASAP Fasteners' offerings with a selection of [BAC standard parts](#), NAS standard parts, Mil-STD components, and items that

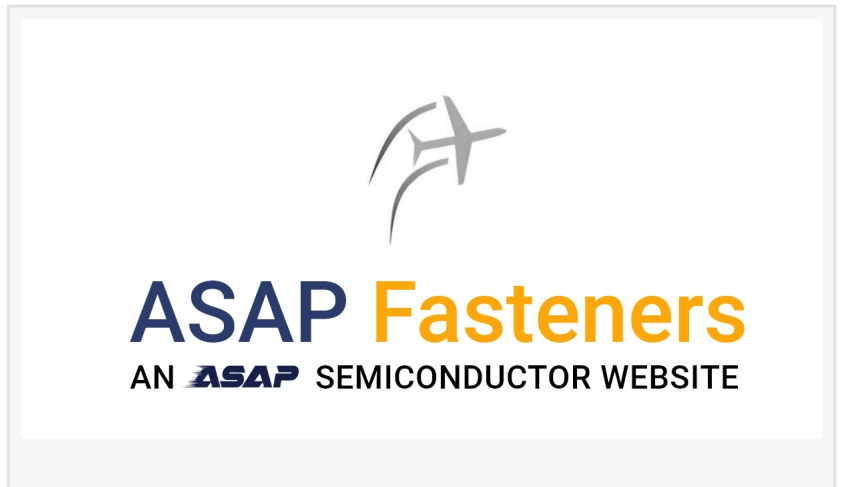

meet various other aerospace standards for performance and quality. Adapting to the dynamic nature of the aerospace industry and customer demand, ASAP Fasteners continually expands inventory offerings to serve as a comprehensive platform that can help customers receive the time and monetary costs associated with procurement.

To promote simplified search processes with expanded offerings, ASAP Fasteners has been designed with a wide variety of curated catalogs that organize offered products by NSN, part

type, Federal Supply Class (FSC), CAGE Code, and other designations.

Furthermore, a lookup tool has also been presented on the website for customers to quickly locate specific aerospace bearings and fasteners through offered filters. Altogether, the database has been developed and redesigned with user-friendliness in mind to reduce the complexity regularly associated with the parts procurement process.

To further simplify purchasing, ASAP Fasteners offers an option for receiving quotations on items of interest entirely online through a Request for Quote (RFQ) service. With this feature on the website, customers can submit details concerning their requirements directly to staff members, and they will then tailor purchasing options that are based on the specifications offered in each form. With ASAP Semiconductor's continual development to support staff and services, customers on ASAP Fasteners can receive streamlined options with dedicated account managers assigned to each customer.

With a goal of serving as a single-source solution, ASAP Semiconductor offers pricing request options for many parts that are not currently listed on the ASAP Fasteners website. For example, team members can leverage market intelligence and purchasing power to track down long lead-time parts and obsolete items while catering to budgets and time constraints. Expedited shipping and same-day delivery options are also available for customers with urgent requirements, such as Aircraft on Ground (AOG) situations. To provide these services, ASAP Fasteners offers a phone number and email that can be used to contact representatives.

With its expanded range of bearings and fasteners, ASAP Fasteners continues to establish itself as a trusted source for comprehensive fulfillment solutions in the global aerospace-grade fastener market, remaining dedicated to meeting the evolving needs of its diverse customer base with quality products and exceptional service. If you are interested in learning more about ASAP Fasteners and its range of offerings, feel free to visit <https://www.asap-fasteners.com/> today.

#### About ASAP Fasteners

ASAP Fasteners is an online purchasing platform for fasteners, bearings, and connector parts that find use in aviation applications. With over 2 billion new, used, obsolete, and hard-to-find items in stock and ready for purchase, customers are welcome to peruse the website at their leisure while taking advantage of an online quote request service for pricing information. Team members are also always just a call or click away from providing tailored purchasing options and

consultation to streamline fulfillment, so do not hesitate to reach out today.
