

NewVue Inc. Announces Strategic Partnership with Electromek Diagnostic Systems to Enhance Radiology Workflow Solutions

NewVue Inc. Partners with Electromek Diagnostic Systems to Advance Radiology Workflow Solution

TAMPA, FLORIDA, UNITED STATES, April 25, 2024 /EINPresswire.com/ -- NewVue Inc., a leader in innovative cloud-native radiology workflow solutions, is pleased to announce a strategic partnership with Electromek Diagnostic Systems, a renowned employee-owned provider of medical imaging equipment and IT solutions. This collaboration empowers Electromek to resell NewVue's flagship product, EmpowerSuite, enhancing radiology practices with state-of-the-art technology.

Emerging from the combined expertise of industry pioneers, including the foundational team of PeerVue, NewVue is dedicated to transforming radiology workflows through advanced AI integration and operational efficiency. Electromek, with its strong foundation in customer-centric service and now fully employee-owned, aligns perfectly with NewVue's commitment to innovation and superior service in the healthcare sector.

Dan Thoma, President of Electromek, expressed enthusiasm about the partnership, noting, "As a system integrator, NewVue's EmpowerSuite complements our existing diagnostic imaging-focused products, allowing us to serve radiologist groups wanting to improve their remote reading efficiencies by creating a common radiologist cockpit across multiple health systems through a single service provider."

The agreement, effective as of March 1, 2024, grants Electromek the rights to market, promote, and resell EmpowerSuite across the United States. EmpowerSuite is renowned for its ability to optimize radiology operations, eliminate the need for multiple worklists, and reduce administrative burdens, thereby addressing the critical needs of the modern radiology environment.

"We are thrilled to partner with Electromek, whose commitment to high standards and customer satisfaction mirrors our own," said Kyle Lawton, CEO of NewVue Inc. "Together, we will drive innovation and efficiency in radiology practices nationwide, continuing to improve workflow solutions and patient care quality."
