About Infrastructure Capital Advisors

Infrastructure Capital Advisors, LLC (ICA) is an SEC-registered investment advisor that manages exchange traded funds (ETFs) and a series of hedge funds. The firm was formed in 2012 and is based in New York City. ICA seeks total-return opportunities driven by catalysts, largely in key infrastructure sectors. These sectors include energy, real estate, transportation, industrials and utilities. It often identifies opportunities in entities that are not taxed at the entity level, such as master limited partnerships ("MLPs") and real estate investment trusts ("REITs"). It also looks for opportunities in credit and related securities, such as preferred stocks.

Current income is a primary objective in most, but not all, of ICA's investing activities. Consequently, the focus is generally on companies that generate and distribute substantial streams of free cash flow. This approach is based on the belief that tangible assets that produce free cash flow have intrinsic values that are unlikely to deteriorate over time. The Russell 2000 Index is a small-cap U.S. stock market index that makes up the smallest 2,000 stocks in the Russell 3000 Index. It is not possible to invest directly in an index. In addition, there is a highly liquid option market according to total option volumes, as of December 8, 2023. *Morningstar ratings are based on risk-adjusted returns.
