Flower Turbines Equity Crowdfunding Raise Offers Time-Limited Bonus Shares

LUBBOCK, TEXAS, UNITED STATES, April 25, 2024 /EINPresswire.com/ -- [Flower Turbines](https://www.startengine.com/offering/flowerturbines), an innovative small wind turbine company, is issuing a special time-limited mid-campaign wake up call for its [equity crowdfunding](https://www.startengine.com/offering/flowerturbines) RegCF offering at <https://www.startengine.com/offering/flowerturbines>

Didn't get that worm with their Early Bird Perk? They are now offering up to a 20% Bonus! Only available from 9:58 am PST April 23, 2024 through 9:58 am PST April 29th, 2024. *Can not be combined with other Volume-Based Perks.

If one invests \$1,000+ during the mid-campaign period, they receive an extra 7% bonus shares on the investment. \$5,000+ then an extra 15% bonus shares. \$10,000+ then an extra 20% bonus shares.

One of the disruptive innovations in the Flower Turbines business plan is to change the market for small wind turbines from one at a time sales to large project sales. As an example, 4 turbines correctly arranged perform as

Mid-campaign Sleepy Bird Perk

Bouquet of Wind Tulip Turbines

well as 8 turbines separately. This has a tremendous potential effect on the cost of wind energy in urban and suburban commercial and residential projects, or anywhere else where space is limited. The significance is like the difference between being able to put only one solar panel per roof versus many. And Flower Turbines does one better: our turbines make their neighbors perform better. This is an important scientific and business-model innovation.

The turbines are also beautiful, quiet, and bird friendly. They start at lower speeds than other turbines and endure higher speeds. Their 30 patents are loaded with aerodynamic, engineering, and electronic advances.

Flower Turbines is a popular investment, having already received over \$16 million of investment in common stock through equity crowdfunding and angel investments. This is its fifth round. Flower Turbines just concluded a \$4.5 million RegA+ raise, its fourth. Two previous RegCF raises were sold out. Investors who want to be a part of it can join the time-limited RegCF equity crowdfunding at

<https://www.startengine.com/offering/flowerturbines>. Larger angel and

institutional investors should contact support.us@flowerturbines.com

Customers can tell them about their proposed project in Europe at support.eu@flowerturbines.com and for the rest of the world at support.us@flowerturbines.com. They also have some regional distributors and will make the connection after screening.

Flower Turbines is a US company with an important branch in the EU that has the goal of making

small wind as powerful a force in renewable energy as solar by using its multiple patents to create a wind turbine that meets all the needs of urban and suburban environments. It combines aerodynamic innovations with beautiful design, low noise, and bird friendliness. Unlike other turbines, they make each other perform better when tightly packed together.

[Technology](#) being developed by Flower Turbines enables a new model in the small wind industry. Focused on creating beautiful, affordable, and efficient turbines for the urban/suburban market and tight spaces, it seeks to pave the way for the future of distributed energy, particularly with solar. Its "Cluster Effect" (whereby their turbines perform better when tightly packed together as opposed to the most common turbines which perform worse when tightly packed) could give them a key advantage to scaling farms of small wind turbines and harnessing the electricity they produce.

Wind and Solar E-bike Charging Poles

"We have the ambition to become a major global force in distributed energy," said CEO Dr. Daniel Farb. "We believe we have the technology and enthusiasm to accomplish it. We are in the right industry at the right time. Incentives for an energy transition in most important areas of the world only add to our scaling up headwinds."

Flower Turbines has external validation as a top company:

- Flower Turbines has been awarded the "Solar Impulse Efficient Solution" Label, a proof of high standards in profitability and sustainability to protect the environment. Here is a link to the page about Wind Tulips on the Solar Impulse website: <https://solarimpulse.com/efficient-solutions/wind-tulips#>
- Flower Turbines was a winner of Pepperdine Graziado Business Schools annual Most Fundable Companies in America list. Flower Turbines was judged to be in the top 10 among 4500 startup companies examined.
- Winner of the Dutch government sustainability award for two separate years.
- A winner of the 2023 Yes San Francisco clean technology competition for top technologies to implement in San Francisco
- The CEO was chosen as a 2021 innovator by the US Department of Energy Impel+ program.
- A winner of many other awards
