BluestoneMining's CEO, John Smith, stated, "We are thrilled to introduce this new feature to our users. Our goal is to make crypto accessible to everyone, and with this offering, we are one step closer to achieving that. We believe that crypto has the potential to revolutionize the financial world, and we want to make sure that everyone has the opportunity to be a part of it."

What is new energy cloud computing power mining?

The traditional steps of Bitcoin mining are "purchase mining machine - deploy mining machine - set up mining - obtain income", but the deployment of mining machine is affected by factors such as electricity price, site, temperature, noise, operation and maintenance. These thresholds require certain conditions. and knowledge to eliminate, thus giving birth to a sub-module in new energy mining - BluestoneMining new energy cloud computing power. New energy is recycled through renewable energy sources such as green electricity, solar energy, and wind energy. Solar energy cycle generates green electricity, conveying the concept of sustainable development of a green earth. Wind energy "circulation" is a key way to increase the application of green power and reduce ore energy consumption. Not only does it greatly save electricity prices, but excess electricity can also be sold to the grid, greatly increasing profits and allowing more investors to obtain passive income.

[New users receive a \\$10 bonus](#) immediately upon registration, further encouraging participation. Bluestonemining protects user funds and personal data with robust security measures, including DDoS and SSL protection systems, while offering comprehensive 24/7 online support.

Opportunities brought by cloud computing power mining

For investors, BluestoneMining new energy cloud computing power has the following advantages:

1. BluestoneMining users and shareholders do not need to purchase mining machines, the initial investment is small and the threshold is low.
2. BluestoneMining users and shareholders do not need to bear additional risks such as mining machine failure, performance loss, and subsequent maintenance costs, and their investment is highly stable.
3. BluestoneMining users and shareholders do not need to deal with machines, sites, etc. after the contract ends, and exit is more flexible.
4. BluestoneMining users and shareholders do not charge any fees: "There is no need to bear the equivalent of computing power (mining machine) rent, hosting fees, electricity fees and mining machine computing power fees.

5. BluestoneMining product advantages:

§ BTC classic computing power: contract price is US\$500, contract period is 6 days, customized for BTC enthusiasts, guaranteed fixed income of US\$500 principal + US\$36.6 profit.

§ BTC classic computing power: The contract price is US\$1,000 and the contract period is 14 days. Taking advantage of the success of BTC's classic computing power, the fixed income is US\$100 principal + US\$183.4 profit.

§ BTC classic computing power: The contract price is US\$3,000, the contract period is 21 days, aiming to extend the mining cycle, and the fixed income is US\$3,000 + profit of US\$894.6.

§ BTC advanced computing power: The contract price is US\$5,000 and the contract period is 28 days, allowing you to maximize profits with a fixed income of US\$5,000 + profit of US\$2,142.

BluestoneMining's free crypto offering is now available to all users, and the company encourages individuals to take advantage of this opportunity to enter the world of crypto. With its commitment to safety and efficiency, BluestoneMining is set to make a significant impact in the world of cryptocurrency.
