

United States Surgical Robots Market is growing at a CAGR of 17.6% from 2024 to 2030 by Exactitude Consultancy

The Exactitude Consultancy Surgical Robots Market Report – Size, Trends, and Forecast 2024-2030

LUTON, BEDFORDSHIRE, UNITED KINGDOM, April 25, 2024 /EINPresswire.com/ -- A new study Global
Trends and Insights has just been made available on Exactitude Consultancy. A detailed study accumulated to offer Latest insights about acute features of the [Surgical Robots](#) Market.

The report contains different market predictions related to revenue size, production, CAGR, Consumption, gross margin, price, and other substantial factors. While emphasizing the key driving and restraining forces for this market, the report also offers a complete study of the future trends and developments of the market. The market includes news and updates about the market current situation, historic data, present market trends, and this factor which is valuable and supportive to the business. It also examines the role of the leading market players involved in the industry including their corporate overview, financial summary and SWOT analysis. The report aims to supply a further illustration of the newest scenario, economic slowdown, and COVID-19 impact on the overall industry. This research report was put together using both static and dynamic viewpoints on business.

“

The surgical robots market is driven by rising demand for minimally invasive surgeries, enhanced precision, and technological advancements.”

Exactitude Consultancy

Exactitude Consultancy is a leading market research and consulting firm, providing comprehensive insights and data-driven solutions for businesses across various industries. Our reports are meticulously researched and offer valuable perspectives on market trends, growth opportunities, and challenges. We are committed to delivering high-quality, actionable intelligence to our clients, helping them make informed decisions and stay ahead in a competitive market.

For more information, please contact us at info@exactitudeconsultancy.com or visit our website at www.exactitudeconsultancy.com.

The Surgical Robots market report highlights information regarding the current and future industry trends, growth patterns, as well as it offers business strategies to help the stakeholders in making sound decisions that may help to ensure the profit trajectory over the forecast years.

□□□□□□□□ □□□□□□ □□□□□□ □□□□□□□□

□□□□□□: □□□□□□□□□□ □□ □□□□□□□□-□□□□□□□□□□ □□□□□□□□

The advantages such as smaller incisions, fewer cuts, decreased scarring, reduced pain, increased safety, faster recovery periods, and considerable cost savings, minimally invasive surgeries (MIS) are on the rise. Robotic minimally invasive surgery adds to these advantages by ensuring greater accuracy, repeatability, control, and efficiency. These procedures also offer highly advanced visualisation capabilities that aid surgeons with a superior view of the operating area and use HD cameras to illustrate microscopic structures. These systems provide greater dexterity than the human hand; given their ability to rotate 360 degrees and superior maneuverability, robots can allow surgeons to reach hard-to-access areas. These benefits of surgical robots, as well as rising demand for better, faster healthcare services, are expected to drive the growth of the market in the coming years.

□□□□□□□□□□: □□□□ □□□□ □□ □□□□□□□□ □□□□□□□□

Robot-assisted surgeries are more expensive than minimally invasive surgeries. It is recommended by the American Congress of Obstetricians and Gynecologists that robotic hysterectomy should only be used for unusual and complex clinical conditions. The association states that in the US, the adoption of robotic surgery for all hysterectomies would add an estimated USD 960 million to the annual cost of hysterectomy surgeries. SS Innovations (India) launched Mantra, a robotic surgical system that costs around Rs 4.5 crore, whereas the Da Vinci system, one of the most commonly used robotic systems, costs between USD 1.5 million and USD 2.5 million (Rs 15 crore) (Source: Business Standard, September 2022). The rising cost of surgeries due to the use of robotic systems is thus expected to restrain the growth of the medical robot market.

□□□□□□□□□□□□: □□□□□□□□□□□□ □□□□□□□□□□□□ □□ □□□□□□□□□ □□□□□□ □□ □□□□□

Outpatient surgery, also known as ambulatory surgery, day surgery, day case surgery, or same-day surgery, does not require an overnight hospital stay. The term "outpatient" means patients may enter and leave the facility on the same day. Greater convenience and reduced costs are the advantages of outpatient surgery over inpatient surgery. Ambulatory surgery centres (ASCs) are freestanding facilities specialising in surgical, diagnostic, and preventive procedures that do not require hospital admission. The cost-effectiveness of ASCs provides significant savings for governments, third-party payers, and patients. Medicare and its beneficiaries save each year because they pay significantly less for procedures performed in ASCs than the rates paid to

hospitals for the same procedures. Patient co-payments are also significantly lower when care is received at an ASC. Owing to these cost benefits, there has been a rapid increase in the number of surgical procedures performed in ASCs and outpatient settings, while hospital in-patient visits have decreased.

□□□□□□□□□□ □□ □□□ □□□□□□:

To carefully analyses and forecast the size of the market by value and volume.

To estimate the market shares of major segments of the Surgical Robots

To showcase the development of the market in different parts of the world.

To analyze and study micro-markets in terms of their contributions to the Surgical Robots market, their prospects, and individual growth trends.

To offer precise and useful details about factors affecting the growth of the Surgical Robots

To provide a meticulous assessment of crucial business strategies used by leading companies operating in the Surgical Robots market, which include research and development, collaborations, agreements, partnerships, acquisitions, mergers, new developments, and product launches.

□□□ □□□□□□□□□□ □□□□□□□□:

How feasible is Surgical Robots market for long-term investment?

What are influencing factors driving the demand for Surgical Robots near future?

What is the impact analysis of various factors in the Surgical Robots market growth?

What are the recent trends in the regional Surgical Robots market and how successful they are?
