## DRIVING FACTORS

### Adoption of Electric Lift Truck is Propelling the Lift Truck Market

Owing to the growth of technological advancements and considering the rising costs of diesel and other fuels, electric vehicles are gaining momentum in production and revenue sales. Electric forklift trucks provide higher efficiency than the other trucks, and also, the components of this machine offer optimal productivity to all its applications. Compared to the internal combustion systems, the performance of the AC truck in parameters such as load-lift ability, ability to negotiate a ramp, acceleration, speed control on-ramps, and braking are gaining the industries' attraction.

AC technology has demonstrated a proven ability to match the performance of Internal Combustion (IC) trucks in these criteria, and in some cases, even surpass them. Currently, certain AC trucks have more capability to speed up compared to the IC truck. Apart from this, a feedback of the spec sheet for Jungheinrich's 5000 lb. Electric counterbalanced truck shows that it has eclipsed the performance specifications of most internal combustion trucks. The industry continues to experience growth in the electric lift truck class primarily owing to the stringent regulations associated with emissions, several sustainability initiatives, and adoption of advanced technologies in electric lift truck components such as batteries.

The Middle East and Africa (South Africa, Saudi Arabia, UAE, Israel, Egypt, etc.)

Asia Pacific was pegged at 546.9 thousand units in 2020 and is anticipated to emerge dominant in this market during the forecast period. The growth of the region is due to the demand for modern material handling equipment across the industries such as construction, mining, food, and beverage, etc. Also, the use of technologically well-versed vehicles in this region is gaining maximum traction and supplementing the growth of the truck industry. Additionally, the presence of the companies across China is the major reason for Asia Pacific to dominate the lift truck's revenue and volume. China has the highest number of local registered and unregistered players which have a decent presence across the country.

China is projected to hold the highest market share owing to the presence of many local forklift manufacturers. These manufacturers offer wide ranges of products worldwide, that too at affordable prices. China is recognized among the largest manufacturing countries worldwide, including developing and developed countries. The presence of a huge number of these local Chinese manufacturers and their variety of sales options interests the global consumer base and hence is estimated to augment the market's growth in the coming years.

North America is expected to witness the highest growth in this volume sales across the region. This is mainly due to the prominent players across the U.S. These market players are indulged in making heavy investments in adopting the advanced and modern forklift type of truck rather than the conventional one. Moreover, the electric lift truck's demand is witnessed majorly across the North America region and is also projected to grow in the same propaganda for the forecast period.
