eHealth Market Statistics: The global eHealth market was valued at \$74,476 million in 2019, and is projected to reach \$2,30,640 million by 2027 at a CAGR of 14.5% from 2020 to 2027.

eHealth Market Segmentation Overview:

Based on type, the medical apps segment accounted for around two-fifths of the global e-health market share in 2019, and is expected to lead the trail by 2027, owing to upsurge in demand for quality healthcare services & solutions, increase in acceptance of mHealth practices, surge in demand for improved patient safety & patient care, and rise in government initiatives to

promote healthcare information technology (HCIT). The same segment would also grow at the fastest CAGR of 21.0% during the forecast period.

Based on formulation, the healthcare providers segment contributed to nearly three-fifths of the global e-health market revenue in 2019, and is anticipated to rule the roost by 2027. This is due to increase in demand for data accuracy to ensure patient safety through improved clinical outcomes, rise in healthcare reforms, and surge in efforts to control healthcare expenditure. On the other hand, the healthcare consumers segment would also register the fastest CAGR of 16.2% from 2020 to 2027.

Based on geography, North America held the highest share in 2019, generating more than two-fifths of the global e-health market. This is attributed to favorable regulatory scenario, high adoption of HCIT solutions to curtail soaring healthcare costs, regulatory requirements regarding patient safety, and the presence of a large number of E-health companies in the region. The market across Asia-Pacific, on the other hand, would register the fastest CAGR of 17.2% throughout the forecast period, due to government investments & reforms to modernize healthcare systems, increase in product launches, rise in medical tourism, implementation of e-health programs, and upsurge in per capita income in the province.
