

US & Canada waste-to-energy market Growth, Competitive Analysis, Prospects, And Top Key Players: Ener-Core, Xcel Energy

WILMINGTON, DE , UNITED STATES, April 29, 2024 /EINPresswire.com/ -- The [U.S. & Canada waste-to-energy market](#) size accounted for revenue of \$1,811.0 million in 2018 and is anticipated to generate \$2,894.0 million by 2026. The U.S. & Canada waste-to-energy market is projected to experience growth at a CAGR of 6.0% from 2019 to 2026.

The U.S. and Canada waste-to-energy market is growing due to surge in demand for renewable sources of energy in these regions, as well as increase in investment by governments to enhance energy production. Further, regulation implemented to reduce carbon content are further anticipated to boost the overall growth of the market. However, high costs associated with plant installation and infrastructure of expensive components are expected to hamper the overall market growth.

U.S. & Canada Waste to Energy Market
OPPORTUNITIES AND FORECAST, 2019-2026

U.S. & Canada Waste to Energy Market is expected to reach **\$2,894.0 million** by 2026.

Growing at a **CAGR of 6.0%** (2019-2026)

U.S. & Canada Waste-to-Energy growth

U.S. & Canada waste-to-energy market trends such as rapid urbanization and upsurge in the production of various renewable energy sources including biomass and other are expected to boost the growth of the market. The incineration segment was valued at \$859.4 million in 2018 and is projected to reach \$1,380.6 million by 2026, growing at a CAGR of 6.1% from 2019 to 2026. The incineration segment accounted for around half of the thermal technology segment in 2018, owing to the perennial modifications in the market and efficient techniques & process, which are in high demand across the globe. Thus, increase in requirement of high-tech waste-to-energy conversion methods fuels the in U.S. and Canada waste-to-energy market growth.

Waste-to-energy is one of the most effective and robust alternative source of energy, which helps in the reduction of CO2 emissions and thus replace the use of fossil fuels. Using waste as a combustion substance is expected to reduce landfill volumes by more than 90%. For every ton of waste burned, one ton of CO2 emission is reduced, which further helps in eliminating methane, which could be leaked with landfill disposal. This factor is anticipated to increase the demand for U.S. & Canada waste-to-energy market.

U.S. & Canada Waste-to-Energy Market Report Highlights

By Technology

Thermal
Incineration
Pyrolysis
Gasification
Biochemical
Others

By Country

U.S.
Canada

The U.S. & Canada waste-to-energy Industry's key market players adopt various strategies such as product launches, product development, collaboration, partnership, and agreements to influence the market. It includes details about the key players in the market's strengths, product portfolio, market size and share analysis, operational results, and market positioning.

□□□ □□□□□□□□ □□ □□□ □□□□□:

By type of technology, the biochemical segment is anticipated to grow at highest CAGR of 6.6% during the forecast period, and is anticipated to maintain the same pace.

By country, the U.S. was the largest revenue contributor of the waste-to-energy market in 2018. Canada waste-to-energy market is growing at the highest CAGR of 6.3% during 2019-2026 owing to rise in energy demand and reduction in dependence on fossil fuels.
