In North Carolina she directed a program pairing volunteers with expectant mothers lacking adequate support systems. This program was adopted by the state which replaced volunteers with paid outreach workers. For the remaining eleven years before retirement, she taught middle school science and social studies.

The primary message Chilton aims to convey through "Overcoming" is twofold. She emphasizes that everyone encounters challenges and requires support to overcome them. Furthermore, the novel underscores the reciprocal nature of providing assistance – the helper benefits as much as the person receiving help. In a world inundated with human suffering showcased through media, Chilton believes that helping others serves as a potent antidote to feelings of helplessness.

"Overcoming" is slated to be a must-read for those seeking a compelling narrative that combines elements of resilience, mystery, and the transformative power of generosity. The novel is

expected to resonate with teen and adult readers, offering both a riveting storyline and a poignant message that transcends time.
