

# Orthopedic Implants Market Update 2024: to Reach USD 73.32 billion by 2032, Claims AMR Report

*market is experiencing growth due to several factors, including the growing incidence of orthopedic disorders, & huge rise in the demand for orthopedic implants*

PORTLAND, OREGON, UNITED STATES, April 30, 2024 /EINPresswire.com/ -- Increase in the prevalence of orthopedic injuries or diseases such as arthritis and osteoarthritis and rapid surge in the aging population across the world who are more prone to

orthopedic diseases drive the growth of the global [orthopedic implants market](#). On the other hand, factors such as the high cost associated with procedures involving orthopedic implants treatment and stringent government policies regarding the implants impede the growth to some extent. However, rise in adoption of orthopedic implants, increase in awareness about the same, and favorable government policies for the development of orthopedic implants are expected to create lucrative opportunities in the industry.

Allied Market Research published a report, titled, "Orthopedic Implants Market by Product Type (Reconstructive Joint Replacements, Spinal Implants, Dental Implants, Trauma, Orthobiologics, Others), by Biomaterial (Metallic Biomaterials, Ceramic Biomaterials, Polymeric Biomaterials, Others), by Type (Knee, Hip, Wrist, and Shoulder, Dental, Spine, Ankle, Others): Global Opportunity Analysis and Industry Forecast, 2022-2032." The report provides a detailed analysis of the top investment pockets, top winning strategies, drivers & opportunities, market size & estimations, competitive landscape, and evolving market trends. The market study is a helpful source of information for the frontrunners, new entrants, investors, and shareholders in crafting strategies for the future and heightening their position in the market.

Allied Market Research has published a study report with the title Orthopedic Implants Market Size was Valued at USD 47.19 billion in 2022 and is Projected to Garner USD 73.32 billion by 2032, registering a CAGR of 4.5% from 2023 to 2032.

**ORTHOPEDIC IMPLANTS MARKET**  
OPPORTUNITIES AND FORECAST, 2022 - 2032

- Globus Medical Inc.

Global Orthopedic Implants Market Research Report

By product type, the reconstructive joint replacements segment held the major share in 2022, generating more than one-third of the global orthopedic implants market revenue, and is expected to rule the roost by 2032. Increase in the prevalence of osteoporosis and osteoarthritis and rise in investment by the key players in the R&D of orthopedic implants drive the growth of the segment. The ortho-biologics segment, on the other hand, would showcase the fastest CAGR of 6.0% from 2023 to 2032. Rise in demand for advanced therapies and minimally invasive procedures and surge in patient awareness toward the use of orthobiologics fuel the segment growth.

By biomaterial, the metallic biomaterials segment contributed to the highest share in 2022, holding nearly two-thirds of the global orthopedic implants market revenue, due to the cost-effectiveness of these materials. The others segment, however, would showcase the fastest CAGR of 5.5% throughout the forecast period. This is owing to the growing demand for these materials due to several advantages over synthetic biomaterials.

By type, the knee segment accounted for around one-fourth of the global orthopedic implants market share in 2022, and is expected to retain its dominance by 2032. Surge in demand for knee implants due to increase in the prevalence of orthopedic diseases and rise in road accidents, sports injuries, and others propel the segment growth. The spine segment, simultaneously, would portray the fastest CAGR of 6.0% during the forecast period. This is attributed to the increase in the geriatric population and the rise in the incidence of spinal disorders.

By region, North America held the highest share in 2022, generating nearly half of the global

orthopedic implants market revenue. Increase in the prevalence of orthopedic disorders, rise in the geriatric population, high healthcare expenditure, and the presence of major key players offering advanced orthopedic implants across the region drive the market growth. Asia-Pacific, at the same time, would display the fastest CAGR of 6.4% from 2023 to 2032. This is due to rise in R&D activities, increase in the prevalence of arthritis & sport-related injuries, unmet medical demands, and surge in investments in the healthcare sector in the region.
