The five compelling reasons for your company to be in the RNG industry:

1. Wisconsin is ground zero with 12% of the US animal RNG projects as tracked by the Environmental Protection Agency's [AgStar](#) database. It is no wonder, it is a dairy powerhouse as the nation's number two milk-producing state.
2. There are no downsides to RNG. It has none of the problems of fossil fuels.
3. RNG is experiencing significant annual growth rate due to solid economic fundamentals, and this growth is accelerating due to new RNG federal tax and funding incentives included in the Inflation Reduction Act of 2022.
4. RNG has captured a major portion of the natural gas transportation market which is important because the EPA is instituting stricter emissions standards for diesel fuel. Cummins Engines is manufacturing RNG engines which means the move RNG as transportation will only accelerate.
