

# Winston AI Introduces Revolutionary AI Image Detector

*Introducing Winston AI's Revolutionary Tool: A Powerful AI Image Detector for Identifying Generative AI and Deepfake Images*

MONTREAL, QUEBEC, CANADA, May 1, 2024 /EINPresswire.com/ -- [Winston AI](#), the leader in AI content detection, is proud to announce the [launch of its groundbreaking AI image detector](#), the first working tool of its kind, designed to accurately identify images generated with the most advanced generative AI and deepfake tools.

This latest innovation represents a significant leap in the battle against online misinformation, providing users with a complete digital forensics solution to identify AI-generated images and assess their origins accurately.

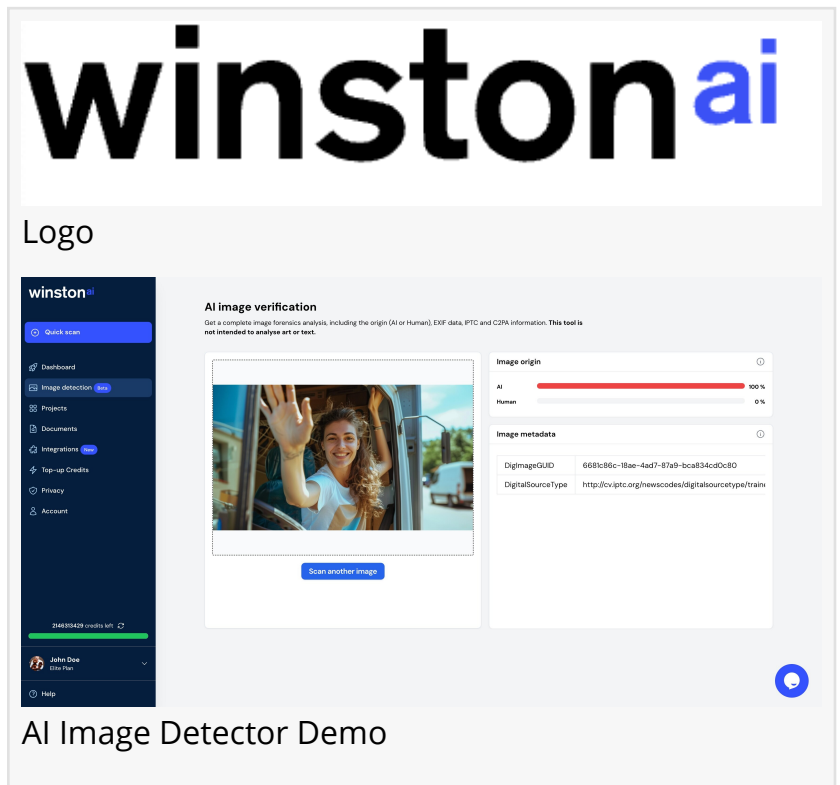

Developed by the dedicated team of experts that has already built the most trusted AI content detection software, this tool leverages its proprietary technology to detect and classify images produced by the most advanced generative AI platforms, including Midjourney, DALL-E, Stable Diffusion, and Meta AI.

## Key Features of the Winston AI Image Detector:

**Advanced Detection Capabilities:** Identify images generated by all generative AI technologies.

**Forensic Assessment:** Provides a detailed forensic analysis that reveals the origin of images, including C2PA and IPTC watermarks, and full Exif details.

**High Accuracy:** Trained with millions of images to operate and classify with a precision that

AI Image Detector Demo

significantly reduces false positives, while still being able to detect the most realistic AI images.

Continuous Updates: Our technology is continuously updated to handle new AI-generated image types and techniques, ensuring it remains at the forefront of digital forensics technology.

As AI generated images become increasingly sophisticated and spread online, our tool provides an essential service in maintaining the integrity of visual content.
