Sam Geha, EVP, Infineon Technologies

“

Sam Geha as an accomplished executive in the industry, and has brought a wealth of experience and expertise to the organization. A must watch interview!”

*Andy Jacob, CEO, DotCom Magazine*

## About Infineon Technologies

Infineon Technologies AG is a global semiconductor leader in power systems and IoT. Infineon drives decarbonization and digitalization with its products and solutions. The company has around 56,200 employees worldwide and generated revenue of about €14.2 billion in the 2022 fiscal year (ending 30 September). Infineon is listed on the Frankfurt Stock Exchange (ticker symbol: IFX) and in the USA on the OTCQX International over-the-counter market (ticker symbol: IFNNY).

## Infineon's IoT Innovations & Developments

Auto-heating buildings and intelligent coffee makers are fantasies of the past. Infineon is spearheading the Internet of Things (IoT) push to bring these ideas to life, and in big ways. Thanks to our 250-person application team and world-leading expertise, our engineers are

continuously working on IoT innovations in the automotive, industrial, smart home, gaming, and health industries, to meet the needs of customers in the most convenient ways possible.

To show you just how much Infineon is doing in this space, we've asked the Executive VP of IoT Compute & Wireless (ICW) to discuss some of the problems we're addressing with IoT.

If what he has to say sounds exciting to you, please visit our Infineon Careers page to check out our open opportunities.

### What is the Internet of Things

The Internet of Things is already changing lives in countless ways, from refrigerators that can re-up on groceries to cars that compromise on parking spots. At Infineon, we work on exciting projects that span five core industries: Automotive, Industrial, Smart Home, Gaming, and Health and Wellness, according to Sam:

Sam Geha, Executive VP of ICW (IoT Compute & Wireless): "Health and fitness is the hottest area for Infineon's IoT development, including wearable devices such as smart watches and glasses that continuously collect health data. Smart homes are a core industry as well—thermostats that keep the home at an ambient temperature, smart coffee machines with verbal commands, and other home-based applications.

### Smart Buildings, AI, & IoT

IoT is set to launch intelligent buildings and advanced AI. Knowing this, Infineon's global

application team is deeply involved in the design and production of both smart buildings and AI programs. According to Sam, these advancements can lead to cutting-edge solutions such as auto-heating office buildings, and even WiFi-enabled facial recognition:

Sam Geha: "For smart homes and buildings, Infineon is working on thermostats that can gauge temperature and automatically turn on A/C units or heaters when appropriate—and for bigger buildings, automated heating or cooling to prepare for employees before they arrive in the morning is in the works. On the AI side, we're seeing facial and image recognition that can integrate with WiFi. These are all within our wheelhouse at Infineon."

Sam Geha joins other leading CEO's, founders, and thought leaders that have participated in this informative and popular interview show. In the interview with Andy Jacob, Sam Geha discusses the newest offerings of Infineon Technologies, what makes the company different than other firms, and shares thoughts on leadership and entrepreneurship. Sam Geha joins other leaders building strong and compelling companies that have been invited to participate in the exclusive series

Andy Jacob, CEO of DotCom Magazine says, "The interview with Sam Geha was amazing. The success of Infineon Technologies is a true testament to their team and their people. It was a real honor to have Sam Geha on the video series.

Andy Jacob says, "It's the goal of DotCom Magazine to provide the absolute best in what entrepreneurship has to offer. We have interviewed many of the world's leading entrepreneurs in their respective field. It takes amazing leadership to build a company like Infineon Technologies. There are so many powerful and talented entrepreneurs throughout the world, and I am extremely
