

# City of Stuart, FL Streamlines Asset Management with OpenGov

FLORIDA, UNITED STATES, May 2, 2024 /EINPresswire.com/ -- The City of Stuart, FL, found its existing asset management system inadequate, particularly due to poor GIS integration and inefficient vendor management that frequently disrupted workflow. To

resolve these critical issues and enhance operational efficiency, Stuart turned to [OpenGov](#), the leader of asset management software for our nation's local governments. With this expansion, the City of Stuart uses every suite in the OpenGov Cloud.

Situated on Florida's Treasure Coast, Stuart struggled with an outdated system that hindered effective communication with vendors and failed to enforce sequential work processes among departments. City leaders were drawn to software that could centralize asset, inventory, and work management into a single, cohesive platform. OpenGov [Cartegraph Asset Management](#) emerged as the best fit due to its powerful GIS integration, customizable reporting tools, and its ability to automate and streamline City operations.

By implementing OpenGov Cartegraph Asset Management, the City of Stuart can anticipate not only a shift in how it manages its assets but also significant improvements in day-to-day operations and long-term planning. The platform will enable more accurate tracking and automation of tasks, reducing manual errors and saving time. Additionally, detailed reporting and views of financials against asset history promise to enhance budget preparation and financial oversight, driving further efficiencies and cost savings for the City.

The City of Stuart joins more than 1,900 public sector organizations leveraging OpenGov to revolutionize work processes with cloud-based software designed specifically for the needs of government.

## About OpenGov

OpenGov is the leader in modern cloud software for cities, counties, state agencies, school districts, and special districts. With a mission to power more effective and accountable government, OpenGov serves thousands of public sector leaders and their organizations. We are built exclusively for the unique budgeting and planning, accounting, permitting and licensing,

procurement, and asset management needs of the public sector. The OpenGov Cloud makes organizations more collaborative and efficient, enabling best-in-class communication with stakeholders and your community.
