

# Township of Hempfield, PA Drives Efficiency in Asset Management with OpenGov

*This system will allow for better resource allocation and maintenance scheduling, significantly reducing downtime and operational costs.*

PENNSYLVANIA, UNITED STATES, May 2, 2024 /EINPresswire.com/ -- The

Township of Hempfield, PA, was ready to replace its existing asset management processes, which relied heavily on outdated Excel databases and inefficient paper-based work orders. To enhance operational efficiency and integrate advanced technology solutions, Hempfield selected [OpenGov](#), the leader in software for our nation's local governments. With the addition of [Cartegraph Asset Management](#), Hempfield now uses every suite in the OpenGov Cloud.

Located in Westmoreland County, Hempfield's asset management was previously mired in manual processes and decentralized data across multiple platforms. The Township needed a solution that could centralize assets, fleet, and inventory into a single, cohesive system and integrated with GIS technology. Cartegraph Asset Management by OpenGov emerged as the ideal choice, offering robust features including preventive maintenance scheduling and 811 integration, which were critical for improving service delivery and operational efficiency.

With the adoption of OpenGov Cartegraph Asset Management, Hempfield Township can anticipate a transformative upgrade to its asset management practices. This system will allow for better resource allocation and maintenance scheduling, significantly reducing downtime and operational costs. Additionally, the comprehensive reporting capabilities of OpenGov will enable more accurate and timely board reports, fostering greater transparency and accountability within the Township's operations. This strategic move is expected to yield substantial long-term benefits for Hempfield, enhancing both staff productivity and community satisfaction.

The Township of Hempfield more than 1,900 public sector organizations leveraging OpenGov to revolutionize work processes with cloud-based software designed specifically for the needs of government.

About OpenGov

OpenGov is the leader in modern cloud software for cities, counties, state agencies, school

districts, and special districts. With a mission to power more effective and accountable government, OpenGov serves thousands of public sector leaders and their organizations. We are built exclusively for the unique budgeting and planning, accounting, permitting and licensing, procurement, and asset management needs of the public sector. The OpenGov Cloud makes organizations more collaborative and efficient, enabling best-in-class communication with stakeholders and your community.
