

Pension Funds Market Poised for Unwavering Growth: Anticipated 5.5% CAGR Through 2032 | BlackRock, BNP Paribas

Pension Funds Market Poised for Unwavering Growth: Anticipated 5.5% CAGR Through 2032 | BlackRock, BNP Paribas

NEW CASTLE, DELAWARE, UNITED STATES, May 2, 2024 /EINPresswire.com/ -- The retirement

The growing emphasis on sustainable and responsible investing, driven by increasing awareness of environmental, social, and governance (ESG) factors are expanding the market reach of pension funds. "

Allied Market Research

payout from a pension fund is guaranteed. It is not based on the stock market such as a 401k. When a company starts its pension, it can create a plan formula to determine an employee's pension benefit. This is usually based on the person's average salary and the number of years he worked at the company. When the employee retires, they receive their promised pension payout. The company is responsible for putting aside enough money to pay this benefit. This feature creates safe retirement income for both the company and its employees, fueling the [pension funds market](#) size.

Allied Market Research published a report, titled, "Pension Funds Market by Fund Type (Defined Benefit Pension Funds, Defined Contribution Pension Funds, and Others), and End User (Government, Corporate, and Individuals): Global Opportunity Analysis and Industry Forecast, 2022-2032". According to the report, the global pension funds industry generated \$64.1 trillion in 2022, and is anticipated to generate \$109.1 trillion by 2032, witnessing a CAGR of 5.5% from 2023 to 2032.

Prime determinants of growth

As populations age globally, the demand for pension products rises, compelling funds to adapt their investment strategies for long-term sustainability. Regulatory changes, aimed at enhancing transparency and accountability within the pension industry, push funds to adopt more sophisticated risk management practices. However, economic uncertainties and low-interest-rate

environments act as significant restraints, challenging funds to generate sufficient returns to meet obligations. On the contrary, technological advancements present opportunities for innovation and growth. Artificial intelligence and data analytics enable funds to enhance investment decision-making, optimize portfolio management, and personalize retirement solutions.

The defined benefit pension funds segment to maintain its leadership status throughout the forecast period

By fund type, the defined benefit pension funds segment held the highest market share in 2022, accounting for nearly three-fourths of the global pension funds market revenue, and is estimated to maintain its leadership status throughout the forecast period. This is attributed to the fact that these funds guarantee a fixed amount of income to retirees, typically based on their salary and years of service. However, the defined contribution pension funds segment is projected to manifest the highest CAGR of 9.0% from 2023 to 2032. This is attributed to the fact that in these funds, individuals contribute a portion of their salary to their pension account, and the funds are invested on their behalf. The eventual retirement income is based on the performance of the investments and the contributions made over time.

The government segment to maintain its leadership status throughout the forecast period

By end user, the government segment held the highest market share in 2022, accounting for more than two-thirds of the global pension funds market revenue, and is expected to witness the [fastest CAGR of 6.2%](#) from 2023 to 2032. This is attributed to demographic changes, such as aging populations, increasing the demand for sustainable retirement solutions, prompting governments to expand their pension offerings. Furthermore, regulatory reforms aimed at strengthening pension systems and enhancing governance further propel market growth by encouraging greater participation and increasing contributions.

North America to maintain its dominance by 2032

By region, North America held the highest market share in terms of revenue in 2022, accounting for more than one-third of the pension funds market revenue and is estimated to maintain its leadership status throughout the forecast period. This is attributed to the robust economic growth and favorable investment conditions which contribute to the accumulation of pension assets and drive pension funds market growth. Moreover, technological advancements enable pension funds in North America to adopt innovative investment strategies, optimize portfolio management, and enhance operational efficiency, further fueling market expansion. However, Asia-Pacific is expected to witness the fastest CAGR of 8.4% from 2023 to 2032. This is attributed to the rapid economic development and urbanization across many countries in the region that

have led to increased wealth accumulation and a growing middle class, driving demand for retirement savings and investment schemes. Moreover, demographic trends, including aging populations and rising life expectancies, are creating need for pension solutions to ensure long-term financial security for retirees.

Leading Market Players: -

BlackRock, Inc.
Deutsche Bank AG
Wells Fargo
The Vanguard Group, Inc.
Bank of America Corporation
UBS
