Global Sustainable Packaging Market Drivers

Governmental Programs for Eco-Friendly Packaging

Plastic has been one of the most pressing issues among the numerous packaging materials for most nations. Over 8.3 billion tonnes of plastic have been created since the early 1950s, according to a report released by the UN environment agency. A landfill or the natural environment is where about 60% of the plastic ends. Additionally, almost 8 million tonnes of plastic make their way into the oceans yearly. Governmental agencies are enforcing prohibitions and putting recycling innovations into practice in industrialized cities like New York and developing countries like India.

Customers make wiser purchasing decisions to ensure environmental protection, and businesses are improving construction methods. A recent analysis titled Sustainability and Changing Consumer Behavior, published by Capgemini, showed that 79% of customers alter their purchasing habits in response to social responsibility, inclusivity, or environmental impact.

Sustainable Packaging Market News

July 2022: Mondi and converter Fiorini International collaborated to develop a new paper packaging option for Italian premium pasta product manufacturer Antico Pastificio Umbro. When applied to all pasta products, the new packaging, which is 100% recyclable, could reduce the amount of plastic used by up to 20 tonnes annually.

April 2022: DS Smith introduced a corrugated cardboard box for the e-commerce shipment of medical devices. The corrugated cardboard box features a single-material solution instead of

glued packaging with a single-use plastic insert.
