

Non-Lethal Weapons Market to Observe Highest Growth of USD 12,490.5 million with Growing CAGR of 7.4% by 2028

By technology, the market is categorized into chemical, electroshock, mechanical and kinetic, acoustic/light, and others.

WILMINGTON, NEW CASTLE, DELAWARE, UNITED STATES, May 2, 2024 /EINPresswire.com/ -- The global [non-lethal weapons market](#) valued \$7,378.2 million in 2020 and is projected to reach \$12,490.5 million in 2028, registering a CAGR of 7.4%.

Increase in territorial conflicts across the world and technologically advanced solutions drive the growth of the global non-lethal weapons market.

However, increase in number of incidents causing adverse effects of use of non-lethal weapons and government regulations and environmental concerns hinder the market growth. On the contrary, rise in budgetary expenses in military and R&D initiatives are expected to open new opportunities for the market players in the coming years.

Rise in territorial conflicts globally and availability of technologically advanced solutions, are expected to drive the global non-lethal weapons market growth during the forecast period. However, government regulations and

environmental concerns, and the rise in number of incidents causing adverse effects due to the use of non-lethal weapons are anticipated to hamper the growth of the market during the forecast period. Moreover, increase in budgetary expenses in military and R&D initiatives are expected to offer growth opportunities for the market in the future.

non-lethal weapons market

Global Non-Lethal Weapons Market Report

The global non-lethal weapons market is categorized into chemical, electroshock, mechanical and kinetic, acoustic/light, and others. The chemical segment accounted for the highest revenue in 2020, owing to the high demand for chemical non-lethal weapons such as tear gas, aerosols, smoke grenades, and chemical projectiles by the law enforcement agencies globally. The rise in popularity of electroshock weapons is expected to increase the demand for electroshock non-lethal weapons over the years.

By technology, the market is categorized into chemical, electroshock, mechanical and kinetic, acoustic/light, and others. The chemical segment accounted for the highest revenue in 2020, owing to the high demand for chemical non-lethal weapons such as tear gas, aerosols, smoke grenades, and chemical projectiles by the law enforcement agencies globally. The rise in popularity of electroshock weapons is expected to increase the demand for electroshock non-lethal weapons over the years.

North America dominates the market in terms of revenue, followed by Europe, Asia-Pacific, and LAMEA. U.S. dominated the global [non-lethal weapons market share](#) in 2020, and Asia-Pacific is expected to grow at a significant rate during the forecast period, due to rise in number of riots and conflicts across several countries in the region. Non-lethal weapons are the weapons that are specifically designed and developed to debilitate or keep away any attacker, and have a low likelihood of injury or fatality, or inactivate equipment, causing a negligible impact on the surroundings.

On the basis of end-users, the law enforcement agencies segment held the largest share in 2020, contributing to around three-fifths of the market. Moreover, the segment is projected to manifest the highest CAGR of 8.1% from 2021 to 2028.

The global non-lethal weapons market is analyzed across several regions such as North America, Europe, Asia-Pacific, and LAMEA. The market across North America held the largest share in 2020, accounting for nearly two-fifths of the market. However, the Asia-Pacific is anticipated to register the highest CAGR of 8.5% during the forecast period.
