

# Construction & Demolition Waste Recycling Market Business Experts Ideas by Top Companies to Reach \$149.2 Bn by 2027

WILMINGTON, DELAWARE, UNITED STATES, May 2, 2024 / EINPresswire.com/ -- Predetermination of Growth -

The analysis of the global construction and demolition waste recycling market in this report is based on various factors including source, service, material, and region. Waste sources examined include construction, renovation, and demolition activities.

Services considered encompass collection and disposal. The materials segment is further categorized into inert, wood, plastic & glass, metal, and other materials. Revenue generated from recycling activities among residential and non-residential users is also included in the report.

The increasing rate of urbanization is anticipated to lead to a surge in waste production. Furthermore, recycling and reusing practices contribute to cost reduction in projects. Additionally, environmental concerns, such as soil, water, and air pollution, have escalated due to unregulated dumping of construction and demolition waste in recent years. Consequently, there's been a significant rise in environmental awareness, driving demand for construction and demolition waste recycling, particularly in developed nations, while adoption is swiftly growing in developing countries.
