Olive oil is a liquid fat that is obtained from olives, a crop typically grown in the Mediterranean Basin. The oil is prepared by pressing whole olives. There are various types of olives such as Picholine, Kalamata, Agrinion olives, Cerignola, and many others, each type is for a particular texture, flavor, or shelf life, which can be used for various applications. By type, the India olive oil market is classified into virgin olive oil, refined olive oil, and pomace olive oil. In 2017, virgin olive oil segment has occupied 15.1% share of the India olive oil market due to its improved nutritional content. The growing acceptance of olive oil for culinary uses is likely to increase its market demand for food and beverage applications.

“

Olive oil is rich in healthy monounsaturated fat such as oleic acid, it contains large amounts of antioxidants and has strong anti-inflammatory properties.”

Allied Market Research

The report offers an in-depth analysis of the market, such as estimates of revenue in the coming years, key segments, factors influencing growth, constraints, and conceivable opportunities. It

also includes an assessment of the competitive landscape and regional analysis. This report serves as a valuable resource for industry leaders, stakeholders, new entrants, and brokers, assisting them in developing tactics to showcase market dominance and gain their enterprise goals.

Health benefits associated with olive oil consumption coupled with its profound demand from end use industries drives the growth of the market. However, high cost and increased requirement of high-water content for cultivation of olive restrain the market growth. On the other hand, development and manufacturing of olive oil products domestically would create new opportunities to the industry.
