"We were struggling with training our 8-week-old energetic Blue Heeler puppy. Dale was always patient and encouraging and often, in 5 minutes, had her doing things we spent time working on with little success. She is now a 5-month-old well-behaved Heeler, but still learning with the training from Dale. If your puppy or dog's training is not going the way you hoped, we can't

“Our Bernedoodle Major needed help with general manners and building confidence out in public. This personalized training helped us learn how to properly work on these things and Major did great. He now goes to his place when we need him to and stay until released. He is able to walk on a loose leash and his recall is greatly improved. He can even wait at an open door until released before bolting out now. We are able to go to public places and feel confident we can manage his behavior and keep him comfortable. Dale understands the dog psychology and I’m very glad we did the training”
