Also, [Emily Vukovic from CHCH News](#) recently visited Magnolia Dental and she was all smiles as she visited Magnolia Dental at Waterdown. Starting from patient management to performing all the comprehensive dental procedures, Magnolia Dental has become a one-stop solution for all dental needs.

Services they offer:

Magnolia Dental in Waterdown offers a wide range of dental services including:

Root canal Treatment

Teeth whitening treatment
Gum surgeries
Implant prosthesis
Crown and bridge
Filling material or restorations
Teeth cleaning services
Braces treatment

Below are a few brief ideas about each of these topics:

Root canal treatment: For treating cracked, broken, or infected teeth, root canal treatment is performed to save them. If left untreated, the infection might spread and may develop repeated dental infections or gum illnesses.

Teeth Whitening: They provide various cosmetic dentistry services including teeth whitening or teeth bleaching procedures that will help and achieve a beautiful smile.

Dental implants: Dental implants restore lost teeth and their functionality as well. At Magnolia Dental, provide a complete set of implant prostheses for full-mouth oral rehabilitation.

Cosmetic dentistry: Their cosmetic dentists treat the teeth and improve the overall appearance of the smile. Apart from teeth whitening services, their expert “5-star rated dentists in Waterdown” have experience in doing simple veneers, and laminates to full mouth rehabilitation. Porcelain veneers are often used to mask stains or imperfections over the tooth surface and can also correct misalignment. However, composite bonding can also achieve similar results and is performed at the chairside at same-day appointments.

Invisalign: Improving the smile with straighter teeth has become much easier with Invisalign treatment. Get pain-free, faster, aesthetic treatment for malaligned or crooked teeth.

Crowns and Bridges: Dental crowns or caps are placed on root canal-treated teeth. After a successful root canal, dental crowns reinforce the strength of the teeth. Moreover, tooth-colored crowns also restore the aesthetically pleasing smile that you need. To fill the gap left by missing teeth, dental bridges are used. Dental bridges are anchored by adjacent natural teeth. Both crowns and bridges are fixed by dental cement.

Full mouth rehabilitation: Due to trauma and severe periodontal problems, multiple tooth loss may occur which needs specialized treatment. Full mouth rehabilitation may take less than one month to more than one year based on the amount of work that needs to be done for complete smile correction.

Innovative technology: The role of advanced and innovative technology to diagnose dental problems with the highest level of accuracy is impeccable. This reduces the time and effort

required by traditional X-rays. Instead, they use high-resolution digital imaging techniques that allow their dentists to detect and treat dental issues that would otherwise remain untreated.

Dr. Inmesh Bajaj, the founder of Magnolia Dental, expresses his commitment to serving the Waterdown community.
