Automatic Visual Inspection Systems Global Market Report 2024 – Market Size, Trends, And Market Forecast 2024-2033

The Business Research Company's [“Automatic Visual Inspection Systems Global Market Report 2024](#) is a comprehensive source of information that covers every facet of the market. As per

“

The automatic visual inspection systems market size is expected to see rapid growth in the next few years. It will grow to \$26.71 billion in 2028 at a compound annual growth rate (CAGR) of 12.5%.”

The Business Research Company

TBRC’s market forecast, the automatic visual inspection systems market size is predicted to reach \$26.71 billion in 2028 at a compound annual growth rate (CAGR) of 12.5%.

The growth in the automatic visual inspection systems market is due to the increasing adoption of Industry 4.0 and smart factory concepts. Asia-Pacific region is expected to hold the largest automatic visual inspection systems market share. Major players in the automatic visual inspection systems market include Hitachi Ltd., Mitsubishi Electric Corporation, Nidec Corporation, Atlas Copco AB , KLA Corporation, OMRON Corporation, Keyence Corporation.

[Automatic Visual Inspection Systems Market Segments](#)

- By Type: 2D Systems, 3D Systems, Camera Systems, Machine Vision Systems, PC Based Systems, Other Types

- By Component: Hardware, Software, Services
- By Application: Surface Inspection, Quality Control And Inspection, Measurement, Other Applications
- By End-Use: Automotive, Semiconductor And Electronics, Food And Beverage, Packaging, Pharmaceutical, Healthcare, Other End-Uses
- By Geography: The global automatic visual inspection systems market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Automatic visual inspection systems (AVIS), also known as machine vision systems or automated optical inspection (AOI) systems, are technologies designed to automatically inspect and analyze objects or products using cameras, sensors, and image processing algorithms. This system is a reliable and efficient way to inspect products in manufacturing environments, reducing the need for manual inspection and improving productivity while ensuring consistent product quality.
