Due to its highly developed retail infrastructure, North America held the global market share for sustainable home decor in 2021. Additionally, intense advertising and celebrity brand endorsements have increased the acceptance of sustainable home decor goods globally, which is boosting the market's expansion. The appeal of sustainable home design items in this region is also boosted by customers spending more on such items and by an improvement in living standards. However, due to the region's rapid infrastructural upgrades in the retail sector and rising consumer disposable income, Asia-Pacific is anticipated to develop at the greatest CAGR during the projected period.

The market is being driven by the increasing use of sustainable materials in furniture manufacture to protect the environment. Additionally, expanding programs like ecologically friendly housing projects in several countries have increased customer interest in eco-friendly furniture. Additionally, the market is anticipated to be driven by the growing number of millennial and generation Z consumers who are purchasing sustainable home decor products.

Due to the abundance of small and medium enterprises, the market for environmentally friendly home decor is quite competitive. A few sustainable strategies include expanding the use of salvaged wood in public and private sector furniture goods and certifications like FTC certification for wooden frames. Businesses are utilizing industry 4.0 technologies to increase manufacturing capabilities. Another aspect that fuels growing competitiveness is the use of e-commerce methods of distribution in high-potential locations.
