

increased use of factor VIII. Hemophilia A is also projected to exhibit the fastest market growth during the forecast period, owing to technological advancements in treatment of hemophilia and product approval by regulating authorities.

On the basis of drug therapy, the recombinant coagulation factor concentrates therapy segment was dominant in 2021 and is expected to remain dominant during the forecast period, owing to increase in the number of recombinant technology products available for the treatment. Moreover, non-factor replacement therapy is projected to exhibit the fastest growth during hemophilia treatment market forecast period, owing to increase in target population and rise in R&D activities on the treatment therapies.

Europe was the highest revenue contributor in the 2021 and is expected to continue the same during the forecast period. This was attributed to the research activities for hemophilia treatment, which are soaring in Europe, owing to the well-established healthcare facilities, recent technological advancements, and rise in demand for early diagnosis of hemophilia due to increase in awareness regarding the disease. Asia-Pacific is projected to register the highest CAGR of 8.3% during the forecast period to the hemophilia treatment market share, owing to increase in incidence of population suffering from hemophilia. In addition, increase in healthcare expenditure offers a lucrative opportunity for the hemophilia treatment industry growth.
