Covid-19 Scenario:

□ The outbreak of the COVID-19 pandemic had a positive impact on the growth of the global internet protocol television market, owing to implementation of global lockdown which resulted to adoption of 'work-from-home' practices.

□ The rising trend of internet usage in households had resulted in the higher internet consumption.

□ The need to subscribe for better internet packages with faster speeds and provision offered by service providers to adhere to add-on facilities such as IPTV services at minimal prices had further offered an impetus to the industry growth during the pandemic.

Inquiry Before Buying: <https://www.alliedmarketresearch.com/purchase-enquiry/A47392>

Based on component, the hardware segment held the highest share in 2021, accounting for nearly two-fifths of the global internet protocol television market. However, the service segment is expected to register the highest CAGR of 10.9% from 2022 to 2031 and is expected to continue its leadership status during the forecast period.
