DEEPTECH ANNOUNCES OPENING OF LOS ANGELES LOCATION

DeepTech, a full-service technology solutions and support company, proudly announces the expansion of their services with the opening of a Los Angeles location.

The Los Angeles location will give DeepTech's customers the high-quality onsite support to supplement the current remote service they have come to know and trust. With the expansion into Los Angeles, DeepTech hopes to continue their support of various industries, including the Fine Art community, Non-Profits, Education, Marketing and Finance.

"We are enthusiastic to bring our technology solutions to the greater Los Angeles area," said Ann Cloyd, CEO, Co-Founder of DeepTech. "It is an exciting step in DeepTech's growth as we have long standing clients in Los Angeles who have come to trust the support and care we provide our customers, to be able to bring that support to others in the area."

DeepTech's offerings include:

- Flexible Helpdesk
- Procurement & Provisioning
- Strategic Projects
- Security & Business Continuity
- Additional Services

As one of the few women led Managed Service Providers in the industry, Ann Cloyd has created a

company that doesn't believe in cookie cutter solutions, you worked hard to make a space for your business and you have unique needs and offerings. East Coast, West Coast or even abroad, with DeepTech, you aren't a client, you're a partner, together we will work to create an IT package that works for you and your business needs.

"We have depended on the knowledge and guidance of DeepTech since 2002 with our technology and more importantly our data security. We are excited to welcome them to the Los Angeles community." – Jeffrey Deitch, Jeffrey Deitch Inc.

"DeepTech has been with us every step of the way, supporting our team when we were under 50 to now with over 1000 employees. They are a trusted partner and congratulate them on their new offerings in California." Harry Doyle, Head of IT for Kepler.
