

Keeper Security Wins Seven Coveted Global InfoSec Awards at RSA Conference 2024

Keeper wins Best Privileged Access Management (PAM) Solution for its zero-trust KeeperPAM® platform.

LONDON, UNITED KINGDOM, May 8, 2024 /EINPresswire.com/ -- [Keeper Security](#), the leading provider of zero-trust and zero-knowledge cybersecurity software protecting passwords, passkeys, privileged access, secrets and remote connections, today proudly announces its recognition by Cyber Defense Magazine, the industry's premier electronic information security publication, as a winner in the following categories for the 12th Annual Global Infosec Awards at RSA Conference 2024:

“

This recognition by Cyber Defense Magazine across multiple categories is a tremendous achievement for our team at Keeper.”

Darren Guccione, CEO and Co-founder, Keeper Security

Next-Gen Chief Executive Officer - Darren Guccione
Most Innovative Chief Technology Officer - Craig Lurey
Best Solution - Privileged Access Management (PAM)
Hot Company - Identity & Access Management (IAM)
Publisher's Choice - Zero Trust
Next-Gen - Secrets Management
Cutting Edge - Cybersecurity Research

Keeper is transforming cybersecurity for people and

organisations around the world, and this accomplishment across a diverse range of categories underscores Keeper's position as an industry leader, innovator and pioneer in cybersecurity.

“Keeper Security embodies three major features we judges look for to become winners: understanding tomorrow's threats, today, providing a cost-effective solution and innovating in unexpected ways that can help mitigate cyber risk and get one step ahead of the next breach,” said Gary S. Miliefsky, Publisher of Cyber Defense Magazine.

Keeper unifies three essential IAM products - Keeper Enterprise Password Manager, Keeper Secrets Manager and Keeper Connection Manager- to create a zero-trust PAM solution: KeeperPAM. Keeper provides the most critical components of privileged access management without the complexity of traditional PAM solutions to quickly and seamlessly integrate with any existing tech and identity and access management (IAM) stack, and achieve enterprise-wide coverage and visibility. The solution enables zero-trust and zero-knowledge security and compliance by unifying password, secrets and connections management into one platform.

“This recognition by Cyber Defense Magazine across multiple categories is a tremendous achievement for our team at Keeper,” said Darren Guccione, CEO and Co-founder, Keeper Security. “We aren’t just committed to security - we are fanatical about it. Our priority is to create simple, easy-to-use and highly scalable solutions to help meet the needs of today’s IT and security professionals. This accomplishment reinforces the efficacy of our approach, and highlights Keeper's commitment to providing best-in-class cybersecurity solutions for unmatched visibility, security and control over an organisation's most important assets.”

Through 2023 and 2024, Keeper partnered with analyst firms and third-party researchers to gauge insights from global IT and security executives about their attitudes, practices and concerns regarding PAM. These research initiatives helped guide Keeper’s approach to product development and enhancement, and have shaped broader cybersecurity discourse. This recognition comes on the heels of Keeper Security's recent launch of two major privileged access capabilities in the Keeper platform: [Time-Limited Access and Self-Destructing Records](#), and the addition of a [Passphrase Generator](#) to the Keeper Web Vault.
