

# FREEN Unveils Insights on Small Wind Energy and Sustainable Development

*FREEN announce the publication of a article titled "How Wind Energy Contributes to the UN Sustainable Development Goals".*

KOHTLA-JÄRVE, IDA-VIRUMAA, ESTONIA, May 9, 2024

/EINPresswire.com/ -- [FREEN](#), a leader in the development and implementation of innovative small wind turbines, is proud to announce the publication of a [comprehensive article](#) titled "Small Wind Energy and Sustainable Development: How Wind Energy Contributes to the UN Sustainable Development Goals" on their official website.

The newly published article explores the significant role of small wind energy in achieving the United Nations Sustainable Development Goals (SDGs), emphasizing the technological

advancements and economic benefits that make small wind turbines a pivotal component in the global transition to sustainable energy.

“

FREEN is committed to advancing sustainable energy solutions that not only address environmental challenges but also foster economic growth and social progress,”

*Gregory Levkovets, COO of  
FREEN*

Key Highlights of the Article:

- Integration with SDGs: The article details how small wind energy supports key SDGs, including Goal 7 (Affordable and Clean Energy), Goal 13 (Climate Action), Goal 12 (Responsible Consumption and Production), and Goal 15 (Life on Land). It demonstrates the critical role of wind energy in reducing greenhouse gas emissions and enhancing energy accessibility and ecosystem

sustainability.

- Technological Innovations: FREEN's advancements in blade design and control systems are highlighted, showcasing how these innovations improve turbine efficiency and reduce environmental impact.

- Economic Efficiency: The article discusses the economic advantages of small wind energy, including reduced production costs, government incentives, and the potential for consumers to sell excess energy, enhancing the financial viability of wind power investments.

- FREEN's Commitment: The article underscores FREEN's dedication to aligning business strategies with global sustainability goals, highlighting their efforts to promote sustainable technologies and support local communities through energy independence and economic sustainability.

Quote from the COO:

"FREEN is committed to advancing sustainable energy solutions that not only address environmental challenges but also foster economic growth and social progress," said Gregory Levkovets, COO of FREEN. "Our latest article provides valuable insights into how small wind energy can drive sustainable development and demonstrates our ongoing efforts to innovate and lead in this critical field."

About FREEN:

FREEN is a pioneering company in the field of small wind energy, dedicated to developing efficient, reliable, and environmentally friendly wind turbines. With a strong commitment to innovation and sustainability, FREEN aims to provide clean energy solutions that support global efforts towards a greener future.
