The factors such as growth in e-commerce industry, rise in international trade, increase in demand for fast delivery of

packages supplement the growth of the dropshipping market. However, security concerns regarding online payments and lack of control in shipping are the factors expected to hamper the growth of the dropshipping industry. In addition, rise in adoption of smartphone and 5G technology and consumer inclination toward online shopping creates market opportunities for the key players operating in the market.

In addition, the dropshipping market has witnessed significant growth in recent years, owing to an increase in preference for online shopping, coupled with the rising trend of cross-border e-commerce trade. For instance, in August 2021, according to the OECD (Organization for Economic Co-operation and Development) organization, among the G20's largest exporters of those products, Argentina (exports up 33.3%), Australia (exports up 17.5%), Brazil (exports up 14.7%), and South Africa (exports up 17.3%) have benefited from increased commodity prices.

By product, the beauty, health, personal, and household care segment is expected to register the highest CAGR of 31.1% during the forecast period. This is due to increase in fashion trends and major product innovations in cosmetic formulations and formats, such as hair color and other skin care products contribute toward growth of the segment. In addition, various market players are making great efforts to initiate digital marketing strategies, prepare interactive advertisements, and promote their products through social media. This increases demand for products. However, the electronics segment held the largest share in 2021, contributing to nearly one-fourth of the global dropshipping market. However, the fashion segment is expected to dominate the market in terms of revenue throughout the forecast period, owing to the innovative designs, favorite fashion choices, and perfect marketing strategies always benefit the industry. Growth in online and e-commerce presence has increased fashion awareness and made high-end his brands and limited-edition products more accessible.

By region, the global dropshipping market across North America dominated the market in 2021, holding more than one-third of the market, and is expected to dominate in terms of revenue during the forecast period, due to rise in e-commerce for buying and selling of goods and services. Digital skills and literacy are also on the rise in Europe as internet users grew from 87% to 89% in 2020, which propels growth of dropshipping in Europe. However, the market across

LAMEA is expected to register the highest CAGR of 31.5% during the forecast period. The booming economies of various countries in LAMEA have increased demand for advanced and improved technology. This opens growth prospects for the [dropshipping market in the region](#). The dropshipping market in the region is more mature, owing to growing adoption of B2B e-commerce in the region, especially in Africa. The report includes analysis of the market across Europe and Asia-Pacific.
