Prime determinants of growth
Growth in financial innovation is the main significant factor driving the growth of the debt security market. Rise in

unpredictability in interest rates and high credit risk hamper the debt security market growth. Government initiatives and stimulus programs are expected to provide significant opportunities for the debt security market growth.

The secondary market trading segment to maintain its leadership status throughout the forecast period

On the basis of components, the secondary market trading segment attained two-fifths of the market share and will continue to dominate the market during the forecast period. This is due to secondary market trading involving the buying and selling of previously issued debt security among investors. Secondary market trading helps in providing liquidity to debt security, thus allowing investors to buy and sell conveniently. However, from 2023 to 2032, the others segment is expected to grow at the fastest rate of 11.7%. The others segment includes research and analytics, regulatory compliance, and legal services and clearing and settlement. The others segment is growing due to increasing complexity in the debt security market, rise in stringency in the regulatory environment of the debt market and growth in risk management in the debt security market.

The treasury bonds segment to maintain its leadership status throughout the forecast period

By type, the treasury bonds segment held the [highest market share](#) in 2022, accounting for more than two-fifths of the debt security market revenue and is estimated to maintain its leadership status throughout the forecast period. This is due to the bonds being issued by the government to finance the operations and to manage the national debt. Treasury bonds are used as benchmarks for pricing other debt securities. However, from 2023 to 2032, the others segment is expected to grow at the fastest rate of 14.4%. The others segment includes green bonds and bond exchange traded funds (ETFs) due to increasing awareness of environment and social responsibility and regulatory support and incentives.

The government segment to maintain its leadership status throughout the forecast period

By industry vertical, the government segment held the highest market share in 2022, accounting for more than two-fifths of the debt security market revenue and is estimated to maintain its leadership status throughout the forecast period. This is due to the increasing government debt security issued by governments that plays an important role in financing government operations and projects. The securities are safest investments that are backed by the taxing power of the issuing government. However, from 2023 to 2032, the others segment is expected to grow at the fastest rate of 10.5%, The others segment includes retail and healthcare. This segment is growing due to the rise in financing requirements and stable cash flows.

North America to maintain its leadership status throughout the forecast period

By region, North America held the highest market share in 2022, accounting for around two-fifths of the debt security market revenue and is estimated to maintain its leadership status throughout the forecast period. This is due to the increase in of the U.S. treasury market in the liquid government bond world. Furthermore, the substantial corporate bond markets and other

debt instruments are also growing in the debt security market in the region. However, from 2023 to 2032, the Middle East and Africa region is expected to grow at the fastest rate of 11.6%. This is due to the growing economic development in the region and increasing government financing requirements.
