

Management Director, SecurityBridge. “The net result is the Next-Generation SecurityBridge Dashboard for SAP that offers the most comprehensive set of SAP security functions at a glance.”

The Next-Generation Security Dashboard for SAP is now a part of the SecurityBridge Platform subscription, demonstrating the company’s commitment to providing the best value to our customers at no additional cost.

About SecurityBridge, Inc.

SecurityBridge is an SAP Security Platform provider developing tools to extend the SAP ecosystem. The company takes a radically different approach to traditional security solutions, believing SAP applications and custom code will be infiltrated no matter how diligently security hygiene is applied. In response to this belief, SecurityBridge created its integrated real-time solution for constant monitoring. Powered by anomaly detection, the SecurityBridge platform can differentiate between accurate results and false positives so that security teams can better focus on real issues.
