Innovative Solution to a Long-Standing Problem

Traditional delivery methods for nutraceutical and cosmeceutical products often result in less than 30% of orally ingested supplements reaching the cells, diminishing their effectiveness. SWYCH's ZorbMax® technology offers a groundbreaking solution by creating ultra-small nutrition particles that deliver nano nutrients directly to the cells, ensuring rapid and efficient absorption.

Key Features of ZorbMax® Technology:

- 1. Maximum Bioavailability:** ZorbMax® particles are so small that millions fit on a pinhead, allowing them to easily enter the bloodstream and deliver nutrients directly to the cells.
- 2. Rapid Action:** By bypassing the traditional digestive processes, ZorbMax® ensures that nutrients reach the cells within minutes, providing immediate benefits.
- 3. Enhanced Performance:** The ZorbMax® technology significantly improves the solubilization and dispersion of nutritional ingredients, enhancing their stability and absorption properties.
