Craft Concierge offers members 24/7 access to physicians via virtual visits, unlimited in-person visits, extended appointments, comprehensive lab testing at no additional cost, same-day appointments, and more. In addition to

primary care services, Craft Concierge will also offer specialty services such as mental health counseling and nutrition planning.

“I’ve observed that my patients value several aspects of direct primary care over the traditional model, such as the convenience of booking same-day or next-day appointments, the opportunity to spend ample time with their physician, and transparent pricing.” remarked Dr. Christina Stamoolis, Craft Concierge medical director.

Craft Concierge was founded with the vision to disrupt the traditional healthcare model by focusing on direct relationships between patients and physicians. The model aims to eliminate the bureaucratic hindrances often associated with healthcare, such as long wait times and impersonal care, to provide a service that prioritizes the patient's health and well-being above all else.
