

# Senseii Games Teaches JavaScript Programming through Video Game Play

*"I would not have started programming if it was not for video games." — Elon Musk, CEO Tesla/ Space X*

DETROIT, MI, US, May 15, 2024 /EINPresswire.com/ -- "Unlock your inner tech genius like Elon Musk" states Ida Byrd-Hill CEO of [Automation Workz](#) and creator of [Senseii Games](#).

Senseii Games is a puzzle maze game where users move a robot from point A to point B using stacked blocks with simple directions, such, "Turn Right", "Move Forward" and "Pen Up". At the end of each level, users receive a message, "Congratulations! You created JavaScript. Go to </> for code. Play next level." Full Javascript code is available to be copied.

The screenshot shows the Senseii Games interface. On the left, a maze is displayed with a red robot at the bottom center and four red stars scattered throughout. Below the maze, several green Scratch-style code blocks are stacked, including 'repeat 5 times', 'do Move Forward by 50', 'Turn Right by 144', 'Pen Up', 'Move Forward by 130', 'Turn Right by 90', 'Pen Down', and 'repeat 5 times do Move Forward by 50 Turn Right by 144'. On the right, the 'Generated Javascript Code' is shown in a dark-themed editor, listing 22 lines of code that correspond to the blocks in the maze.

Stacking Senseii Games Blocks to Generate JavaScript Code

The mazes get more complicated at each level and so does the JavaScript code, proving users have the algorithmic mindset needed for technology careers.

“

Our highest graduate is earning \$166,000 with 30% of our alumni earning over \$100,000. They began their tech career playing Senseii Games. You Should, too”

*Ida Byrd-Hill, CEO,  
Automation Workz*

Automation Workz has been using Senseii Games as an admissions tool for their Cybersecurity, network engineer and Artificial Intelligence (AI) & Data Analytics workforce development tech training programs. Ida Byrd-Hill exclaims, “Our learners attend tech certification training for 36-48 weeks and earn like a college graduate. Our highest graduate is earning \$166,000 with 30% of our alumni earning over \$100,000.” Many of our learners earned \$10-

\$15 per hour before playing Senseii Games and attending training. After training, our average

learner hourly wage is \$32.”

Senseii Games is an electronic version of building blocks. It is easy to play and easy to learn how to code JavaScript.

Automation Workz is giving away Senseii Games for Free to any adult or young person who wants to play their way to a high-paying tech job.
