Chronicling the story of our David vs. Goliath battle against censorship in a world increasingly moderated by Silicon Valley technocrats, "We Will Not Be Silenced" is a

cautionary tale for the modern age which underscores the importance of free speech, while reminding its audience how fragile this most fundamental of human rights really is.

"This documentary is a testament to the indomitable spirit of individuals who have bravely confronted challenges and fought for their right to be heard. It is a powerful reminder that, even in the darkest of times, the human spirit prevails."

Focussed on 46 days in 2020, the documentary charts London Real's tumultuous journey as we fought to broadcast and maintain our editorial independence having been deplatformed, all while under increasing scrutiny from governments and social media platforms alike...

... And how despite being banned by the powers-that-be, we successfully managed to find other ways to reach our audiences...

... Livestreaming to over 1 million people through our own independent broadcasting solution and ushering in a new generation of self-publication, as content creators from across the world begin the fightback against Big Tech censorship.
