Penny and Lee, dedicated to merging ergonomic design with aesthetic elegance, have engineered a pillowcase that not only enhances bedroom decor but actively contributes to a healthier sleep environment. By integrating copper, known for its [antimicrobial properties](#), with the softness of mulberry silk, these pillowcases offer a unique benefit: they help destroy harmful microbes, thereby reducing the presence of bacteria, viruses, and fungi around your sleeping area.

“

Penny & Lee pillowcases are made with a luxurious combination of mulberry silk and copper-infused viscose material.”

“Copper has been recognized for thousands of years for its

health benefits, and we’ve harnessed that ancient wisdom combined with modern technology in our pillowcases,” Lea explained. “This isn’t just about beauty sleep; it’s about creating a cleaner, healthier environment for your skin and hair every night.”

The pillowcases also feature a smooth surface that reduces friction, which can help minimize hair breakage and the formation of fine lines. “Our goal is to support not just a restful night’s

sleep but also a beauty regimen that starts with where you rest your head," Stephanie added.

To celebrate the launch of their online store, Penny and Lee are offering an exclusive 10% discount on all first-time purchases. This limited-time offer invites customers to experience the unique combination of luxury, comfort, and hygienic benefits these pillowcases offer.
