Factors such as rise in demand for efficient traffic management solutions, increase in the number of vehicles, and reduction in environmental pollution majorly drive the adoption of tolling & city congestion systems.

However, high capital investment for transportation & tolling system, large database requirement for road & tolling network, and low acceptance ratio restrict the market growth. Furthermore, investments in the idea of smart cities and innovation of smart signal have created lucrative opportunities for the [Asia-Pacific tolling & city congestion market](#).
