

Pixite releases Cubes: Create 3D Designs on Apple Vision Pro

Award-winning app company Pixite releases Cubes, an interactive Apple Vision Pro app which empowers users to easily build virtual 3D creations with voxels.

SAN DIEGO, CALIFORNIA, UNITED STATES, May 28, 2024 /EINPresswire.com/ -- [Pixite](#) today

“

We built a set of gestures that uses hand tracking in a new and unique way so you can really reach out and create simple models in a very intuitive way.”

Scott Sykora

announces its newest Apple Vision Pro app: [Cubes](#). Cubes is a playful 3D experience that allows users to create meditative patterns, castles, game characters – and more – with virtual building blocks that are controlled by hand gestures and eye tracking.

“Cubes came out of an exploration around how to be creative in the Spatial Computing environment. We already have so many ways to doodle, paint or draw on two dimensional canvases. We wanted to explore what we

could do in 3D to empower anybody to create 3D models in a simple and intuitive way,” says Scott Sykora, Pixite’s Co-Founder and lead developer.

KEY FEATURES

Interactive Menu: Easily change cube materials and colors.

Intuitive Creating: Pinch to add cubes. Add individually or in batches.

Easy Pivots: Cubes’ rotatable stage allows you to create from any position.

Models: Experiment with pre-made models for inspiration and guidance.

Save Projects: Save your progress and return to your project to pick up where you left off.

Price

Cubes is a one time fee of \$4.99.
