## Drivers, Restraints, and Opportunities

Increase in open account trading opportunities, rise in awareness & understanding of supply chain financing, and surge in need for alternate sources of financing for small & medium enterprises (SMEs) drive the growth of the global factoring services market. However, lack of strict regulatory frameworks for recovering debts and restrictions on foreign currency restrain the market growth. On the other hand, increase in technological advancements such as automated invoices present new opportunities in the coming years.

## Covid-19 Pandemic

During the initial stages of the Covid-19 pandemic, the factoring services market was impacted negatively as there were disruptions in the supply chain and financial impact on the businesses with economic uncertainty.

Investments in factoring service became immensely popular with rise in attention toward data for helping financial institutes determine the future performance and take necessary corrective measures at early stages.

The pace of digital transformation surged considerably during the pandemic. The governments of various countries became the top competitors for offering factoring services as they implemented various forgivable programs and zero-cost money.

During the post-pandemic period, the IMF survey highlighted that many operations were utilizing financing solutions to facilitate cash flow restrictions. In addition, a staple cash flow financing option was used across many industries.

#### Key companies profiled

Advanon AG, ALAMI Technologies, Aldermore Bank PLC, AwanTunai, Barclays PLC, BNP Paribas, China Construction Bank, Deutsche Factoring Bank, Eurobank, Hitachi Capital (UK) PLC, HSBC Group, ICBC, KUKA Finance JS, Mizuho Financial Group, Inc, Riviera Finance of Texas, Inc, Societe Generale, and The Southern Bank Company Access Table PDF

#### The Manufacturing Segment to Maintain its Leadership Status During the Forecast Period

Based on industry vertical, the manufacturing segment accounted for the largest market share in 2021, contributing to nearly one-third of the global factoring services market, and is projected to maintain its leadership status during the forecast period. This is due to elimination of issues of manufacturing plant such as shortage of cash flow issues and ability to roll out payments to suppliers, raw materials providers, and expenses without incurring late fees, damaging business credit, or worrying about quitting of employees. However, the healthcare segment is estimated to witness the highest CAGR of 9.3% from 2022 to 2031, owing to patient claim process taking more than two months to process that creates a huge gap in working capital.

#### The Banks Segment to Maintain its Lead Status by 2031

Based on provider, the banks segment held the largest market share in 2021, accounting for around four-fifths of the global factoring services market, and is expected to maintain its lead status by 2031. This is due to rise in digitization across the banking sector to fill the current gaps in financial services and surge in efficiency in the banking sector to provide improved customer experience. However, the NBFCs segment is projected to grow at the fastest CAGR of 7.5% from 2022 to 2031, owing to offering of factoring services to businesses with low rate and rapid payment time.

#### The Large Enterprise Segment to maintain its Lead Position during the Forecast Period

Based on enterprise size, the large enterprise segment contributed to the highest market share in 2021, holding nearly three-fourths of the global factoring services market, and is projected to maintain its lead position during the forecast period. This is due to increase in usage in a

number of large enterprises such as education hubs, healthcare companies, and government sector. However, the SMEs segment is estimated to register the highest CAGR of 8.0% from 2022 to 2031. This is attributed to increase in their business reach and cost-effectiveness of factoring services.

### Europe to Maintain its Dominance in Terms of Revenue by 2031

Based on region, Europe contributed to the largest market share in 2021, accounting for more than two-thirds of the global factoring services market, and is expected to maintain its dominance in terms of revenue by 2031. This is due to rapid adoption of factoring services in Central and Eastern Europe (CEE) and the strategic importance of receivables funded by the commercial banking sector. However, Asia-Pacific is projected to manifest the fastest CAGR of 7.6% during the forecast period. This is owing to rapid growth of economies with infrastructural and industrial growth in the region.
