The growth of the global shared mobility market is propelling, due to rise in venture capital and strategic investments, government initiatives for smart cities, and increase in inclusion of e-bikes in the sharing fleet. However, low rate of internet penetration in developing regions is the factor hampering the growth of the market. Furthermore, increase in government initiatives for the development of bike sharing infrastructure is the factor expected to offer growth opportunities during the forecast period.

The report offers detailed segmentation of [the global shared mobility market based on service model](#), vehicle type, vehicle propulsion, sales channel and region. The report provides an analysis of each segment and sub-segment with the help of tables and figures. This analysis helps market players, investors, and new entrants in determining the sub-segments to be tapped on to achieve growth in the coming years.

□□□□□ □□ □□□□□□□ □□□□□, the public transit segment accounted for more than half of the total

market in 2021, and is projected to lead the trail by the end of 2031. However, the bike sharing segment would cite the fastest CAGR of 15.3% throughout the forecast period. The report also discusses car sharing, ride-hailing and microtransit under this segment.

Four-wheeled vehicles, the buses and rails segment contributed to more than half of the global market in 2021, and is expected to maintain its dominance through 2031. The two-wheelers segment, on the other hand, would grow at the fastest CAGR of 14.2% from 2022 to 2031. The report also discusses passenger cars and others under this segment.
