HashKey Global Launchpool, the world's first regulated platform for pledge to earn new tokens, is now live

BERMUDA, May 27, 2024 /EINPresswire.com/ -- HashKey Global announced the launch of LaunchPool and initiated the first project Polyhedra Network（ZK) pledge to earn campaign, aiming to create a new trading and participation model, enhance user engagement and loyalty, and provide a platform for promotion and development for emerging projects.

HashKey Global's Launchpool platform offers users an alternative cryptocurrency pledging solution. Users may pledge their existing cryptocurrencies to the pool and may redeem tokens at any time, adjusting their investment strategy flexibly to adapt to market changes. This platform not only provides projects with the opportunity for initial token distribution, enhancing their visibility, but also allows investors early access to innovative projects and potentially earning rewards through pledging.

As the flagship global digital asset exchange under HashKey Group, HashKey Global provides licensed digital asset trading services to users worldwide (save for restricted countries and regions). HashKey Global has been granted a license from the Bermuda Monetary Authority (BMA). HashKey Global Launchpool is the first platform of its kind among globally licensed exchanges to offer pledging for new coins. HashKey Global's Launchpool platform provides investor asset protection and compliance measures such as AML, KYC, and KYT.

In recent times, Ethereum assets have gained further recognition in the market, with significant progress also seen in Ethereum Layer 2 networks such as Taiko, zkSync, Scroll, among others. HashKey Global Launchpool has launched its first project, Polyhedra Network (ZK), a star project based on zero-knowledge proofs interoperability protocol. It provides users with approximately 325,000 ZK tokens, valued at around $500,000 USDT in total, as rewards. The event runs from May 30th to June 4th, 2024.
