

Air scrubber Market Detailed Analysis of Current and Future Industry 2030

Air scrubber Market Size, Share, Competitive Landscape and Trend Analysis Report by Product Type, Filter Type and End-user Industry 2021-2030

WILMINGTON, DELAWARE, UNITED STATES, May 28, 2024 /EINPresswire.com/ -- The global [air scrubber market](#) size was valued at \$1,883.3 million in 2020, and is projected to reach \$4,306.4 million by 2030, registering a CAGR of 8.5% from 2021 to 2030.

An air scrubber eliminates air pollution, volatile organic compounds (VOCs), surface pollutants, pet dander, smells, and dust. The air scrubber continually creates negative ions as air passes through the ducting system. Those negative ions are dispatched to locate and return contaminants floating in air that are too tiny to be caught by a standard air filter.

Market Outlook:

To strengthen their market position, competitors in the air scrubber market use strategic moves such as mergers, acquisitions, and market initiatives. For instance, in June 2020, Daikin Industries, Ltd. and WASSHA Inc., have recently formed Baridi Inc. to operate an air conditioner subscription business. Daikin Industries and WASSHA have partnered to take use of Daikin's air conditioners, which are recognized for their high durability, efficiency, and minimal environmental effect as well as the company's capacity to develop service networks. Hence, these air scrubbers can be utilized in hospitals and chemical industries to reduce surrounding air pollution and rise in concern related to health is expected to provide lucrative growth in the market.

Increasing investments and supporting government policies and programs to comply with air quality index standards and greenhouse gas emission limits are also projected to boost air scrubber market growth during the forecast period. For instance, in May 2019, Germany has enacted a national air pollution management program that mandates national emission reductions by 2030, including fine particulate matter reductions and the SLCP black carbon standard.

Key Points:

The report provides an extensive analysis of the current and emerging air scrubber market trends and dynamics.

Depending on product type, the wet segment dominated the market, in terms of revenue in 2020.

By end user industry, the metal processing registered highest revenue in 2020.

Asia-Pacific is projected to register highest growth rate in the coming years.

The report provides an extensive analysis of the current trends and emerging air scrubber market opportunities.

In-depth air scrubber market analysis is conducted by constructing estimations for the key segments between 2021 and 2030.

The key players within the air scrubber market are profiled in this report, and their strategies are analyzed thoroughly, which help understand competitive outlook of the air scrubber industry.

Players Are:

Key companies profiled in the air scrubber report include Advanced Air Technologies Inc., Amaircare Corporation, Camfil AB, Croll Reynolds, Inc., Daikin Industries, Ltd., Honeywell International, Inc., Novatek Corporation, Parker Hannifin Corporation, SPX Corporation, Waves Aircon Pvt. Ltd.
