Some of the key facts of the Cough in Idiopathic Pulmonary Fibrosis Market Report:

The Cough in Idiopathic Pulmonary Fibrosis market size was valued approximately USD 154 million in 2022 and is anticipated to grow with a significant CAGR during the study period (2020-2034)

In 2022, the combined market of the EU4 countries and the UK reached around USD 45 million, with expectations of significant growth at a substantial compound annual growth rate (CAGR). The UK held the largest market share among European countries, followed by France, Italy, and Spain. Conversely, Germany represented the smallest market share in the same period.

According to DelveInsight's assessments, the total number of diagnosed prevalent cases of Cough in Idiopathic Pulmonary Fibrosis (IPF) across the 7MM stood at approximately 148

thousand cases in 2022. These figures are expected to rise in the forecast period.

In 2022, the United States recorded around 95 thousand diagnosed cases of Idiopathic Pulmonary Fibrosis (IPF), with projections indicating a continuous increase at an estimated Compound Annual Growth Rate (CAGR) over the study period from 2020 to 2034.

In the group of seven major markets (7MM), the United States reported approximately 76 thousand diagnosed prevalent cases of Cough in Idiopathic Pulmonary Fibrosis (IPF). Forecasts suggest that these cases will continue to rise throughout the forecast period from 2023 to 2034.

In 2022, the seven major markets (7MM) reported approximately 184,000 diagnosed prevalent cases of Idiopathic Pulmonary Fibrosis (IPF), with expectations of an increase by 2034. Notably, the United States accounted for around 95,000 cases, experiencing a temporary decline due to COVID. However, a recovery was anticipated by 2023. Among these IPF cases, Cough was diagnosed in 80% of individuals.

In the EU4 countries and the UK, the UK had the highest diagnosed prevalent cases of Idiopathic Pulmonary Fibrosis (IPF) with approximately 16 thousand cases in 2022. France followed closely with around 15.5 thousand cases, while Germany reported the fewest cases with approximately 11 thousand.

Key Cough in Idiopathic Pulmonary Fibrosis Companies: Orvepitant Maleate, Haduvio (nalbuphine ER), ME-015 (Suplatast Tosilate), BI 1839100, and others

Key Cough in Idiopathic Pulmonary Fibrosis Therapies: Orvepitant Maleate, Haduvio (nalbuphine ER), ME-015 (Suplatast Tosilate), BI 1839100, and others

The Cough in Idiopathic Pulmonary Fibrosis market is expected to surge due to the disease's increasing prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Cough in Idiopathic Pulmonary Fibrosis pipeline products will significantly revolutionize the Cough in Idiopathic Pulmonary Fibrosis market dynamics.

Cough in Idiopathic Pulmonary Fibrosis Overview

Cough in Idiopathic Pulmonary Fibrosis (IPF) refers to the presence of persistent coughing in individuals diagnosed with IPF. IPF is a progressive lung disease characterized by the scarring of lung tissue, which leads to difficulty breathing and reduced lung function over time. Cough is a common symptom experienced by many IPF patients and can be persistent and bothersome.

Cough in Idiopathic Pulmonary Fibrosis Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted epidemiology trends in the seven major countries (7MM) from 2020 to 2034. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed patient pool and future trends.

Cough in Idiopathic Pulmonary Fibrosis Epidemiology Segmentation:

The Cough in Idiopathic Pulmonary Fibrosis market report proffers epidemiological analysis for the study period 2020–2034 in the 7MM segmented into:

Total Prevalence of Cough in Idiopathic Pulmonary Fibrosis

Prevalent Cases of Cough in Idiopathic Pulmonary Fibrosis by severity

Gender-specific Prevalence of Cough in Idiopathic Pulmonary Fibrosis

Diagnosed Cases of Episodic and Chronic Cough in Idiopathic Pulmonary Fibrosis

Cough in Idiopathic Pulmonary Fibrosis Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Cough in Idiopathic Pulmonary Fibrosis market or expected to get launched during the study period. The analysis covers Cough in Idiopathic Pulmonary Fibrosis market uptake by drugs, patient uptake by therapies, and sales of each drug.

Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Cough in Idiopathic Pulmonary Fibrosis Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

Cough in Idiopathic Pulmonary Fibrosis Therapies and Key Companies

Orvepitant Maleate: NeRRe Therapeutics

Haduvio (nalbuphine ER): Trevi Therapeutics

ME-015 (Suplatast Tosilate): Melius Pharma AB

BI 1839100: Boehringer Ingelheim

Scope of the Cough in Idiopathic Pulmonary Fibrosis Market Report

Study Period: 2020–2034

Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]

Key Cough in Idiopathic Pulmonary Fibrosis Companies: Orvepitant Maleate, Haduvio (nalbuphine ER), ME-015 (Suplatast Tosilate), BI 1839100, and others

Key Cough in Idiopathic Pulmonary Fibrosis Therapies: Orvepitant Maleate, Haduvio (nalbuphine ER), ME-015 (Suplatast Tosilate), BI 1839100, and others

Cough in Idiopathic Pulmonary Fibrosis Therapeutic Assessment: Cough in Idiopathic Pulmonary Fibrosis current marketed and Cough in Idiopathic Pulmonary Fibrosis emerging therapies

Cough in Idiopathic Pulmonary Fibrosis Market Dynamics: Cough in Idiopathic Pulmonary Fibrosis market drivers and Cough in Idiopathic Pulmonary Fibrosis market barriers

Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies

Cough in Idiopathic Pulmonary Fibrosis Unmet Needs, KOL's views, Analyst's views, Cough in Idiopathic Pulmonary Fibrosis Market Access and Reimbursement
